INTRODUCES

**A GLOBAL LEADER IN
BRAKING
SOLUTIONS**

PERFORMANCE \ INNOVATION \ STYLE

BRAKE PADS

BETTER PERFORMANCE

OE-equivalent friction formulations are specifically engineered to enhance braking power, minimize braking distance and provide a quiet and safe braking experience in all road conditions.

SCORCHING

Brembo pads are thermal scorched according to Brembo OE specifications to reduce running-in and fading.

UNDERLAYER

Provides noise dampening and heat shield to reduce heat transfer to the caliper.

PREMIUM RED METAL SHIM

The multi-layer ESE (Elastomer - Steel - Elastomer) red shim minimizes vibrations and noise, clearly identifying it as a Brembo product.

OE DIRECT MOLDING

OE Direct Molding Pressing Process guarantees maximum product accuracy. The positive molding process uses extreme pressure to compress the friction material and bond it to the backing plate.

Brembo Low Met

Brembo NAO

BRAKE ROTORS

UV COATING

A wider and constantly updated new line, based on new technology developed in collaboration with car manufacturers for more practical fitting procedures and greater resistance to corrosion.

PILLAR VENTING TECHNOLOGY

Exclusive system which enhances cooling potential and increases disc resistance by over 40%.

SCREW KIT

Mounting screws are included in the disc package for easier, safer and more efficient installation.

HIGH CARBON

Cast iron disc with a high carbon content, to minimize vibration and noise while optimizing performance and enhancing driving comfort.

ECER-90

UN ECE R90

The entire Brembo line of brake discs and drums, including the special Brembo Xtra family, is UN ECE R90 type approved.

THE NEW BREMBO BEYOND EV KIT.

**GREENER THINKING,
UNIQUE SOLUTIONS.**

**THE NEW BREMBO BEYOND EV KIT.
LET'S GO FURTHER!**

Unique in the
Independent
Aftermarket

No rust, less dust

Dedicated solution
for electric cars

Better for the
environment

Better performance,
more sustainability

Striking and bold
design

Protection against
oxidation

LUBRICANT

EASY TO APPLY

Thanks to its low viscosity level it spreads evenly on the backing plate without breaking up, maintaining its lubricating properties for a long time.

WASH RESISTANT

Brembo B-QUIET is also extremely resistant to washing and to high temperatures, because it is insoluble.

NO METALLIC SOAPS AND FATTY ACIDS

Its mineral composition, which is oil-based, has no metallic soaps and no fatty acids that make it non-conductive.

PROTECTS AGAINST CORROSION

Its non-corrosive properties also make it compatible with all metals.

BREMBO PREMIUM BRAKE FLUID

LIMIT VAPOR LOCK

Strong points: reduced viscosity and high boiling point.

Brake discs, calipers, pads and brake and master cylinders are the four cardinal points of each braking system; however, they are likely to be useless without the core of the entire system, the brake fluid.
