# Men

Find your size using a measuring tape:

- Chest circumference: Measure the widest circumference of your chest. The tape should be flat against your chest, under your armpits, and parallel to the ground during the measurement. Keep the neck relaxed and breathe naturally. The tape measure should be snug enough to fit one finger.
- Waist circumference: Measure around the upper waist, above the navel. Keep the neck relaxed and breathe naturally. The tape measure should be snug enough to fit one finger.
- Hip circumference: Measure horizontally around the largest part of your hips.
- If you are in between two sizes, size up for a looser fit, size down for a tighter fit.

# Men’s footwear

Find your size with a measuring tape:

- Stand against a wall (with your heels touching the wall).
- Place an object (e.g., a book) against your longest toe. Measure your foot from the back of the heel to the object.
- Repeat this process for the other foot.
- Most of our shoes come in European sizes. The guide below shows you the corresponding US size. If you are in between two sizes, choose the larger one.
- An "M" before a size indicates US men's size. A "W" before a size indicates a US women's size.

# Babies and children

Find your size with a measuring tape:

- Height: Stand against a wall (barefoot or in socks), heels touching the wall. Stand straight, then place a book or other flat object on the top of your head. Hold it against the wall and mark the bottom edge of the book. Measure the distance from the floor to the mark you made.
- Chest circumference: Measure the widest circumference of your chest. The tape should be flat against your chest, under your armpits, and parallel to the ground during the measurement. Keep the neck relaxed and breathe naturally. The tape measure should be snug enough to fit one finger.
- Waist circumference: Measure around the upper waist, above the navel. Keep the neck relaxed and breathe naturally. The tape measure should be snug enough to fit one finger.
- Hip circumference: Measure horizontally around the largest part of your hips.
- If you are in between two sizes, size up for a looser fit, size down for a tighter fit.

# Babies and children’s footwear

Find your size with a measuring tape:

- Stand against a wall (with your heels touching the wall).
- Place an object (e.g., a book) against your longest toe. Measure your foot from the back of the heel to the object.
- Repeat this process for the other foot.
- Most of our shoes come in European sizes. The guide below shows you the corresponding US size. If you are in between two sizes, choose the larger one.
- A "C" in front of the size indicates US children’s size.

Includes sandals, water shoes, sneakers and boots

# Skates

## Rollerblades, hockey skates, and figure skates

Find your size with a measuring tape:

- Stand against a wall (with your heels touching the wall).
- Place an object (e.g., a book) against your longest toe. Measure your foot from the back of the heel to the object.
- Most of our shoes come in European sizes. The guide below shows you the corresponding US size. If you are in between two sizes, choose the larger one.
- An "M" in front of a size indicates US men's size. "W" indicates US women's size. "C" indicates US children's size.

## Swimsuits

Find your size with a measuring tape:

- Height: Ask someone to help you measure the distance from the top of your head to the floor.
- Chest: Measure the circumference around the widest part of your chest while keeping the tape under your armpits.
- Waist: Measure at its narrowest circumference (above your belly button). Look straight ahead and breathe normally.
- Hips: Measure horizontally around the largest part of your hips.
- If you are in between two sizes, size up for a looser fit, size down for a tighter fit.

# Snorkelling

Includes Easybreath masks, snorkelling masks and fins for children and adults

## Easybreath masks

To find the distance between your eyes and chin:

- If possible, ask someone to help you measure the distance between your eyes and chin.
- Place a rigid ruler against the bottom of your chin and measure the distance between the middle of your pupil to the bottom of your chin.

Size	Age	Distance between eyes and chin (centimetres)	Distance between eyes and chin (inches)

## Snorkelling fins

Find your size with a measuring tape:

- Stand against a wall (with your heels touching the wall).
- Place an object (e.g., a book) against your longest toe. Measure your foot from the back of the heel to the object.
- Repeat this process for the other foot.
- Most of our shoes come in European sizes. The guide below shows you the corresponding US size. If you are in between two sizes, choose the larger one.
- An "M" before a size indicates US men's size. A "W" indicates US women's size. A "C" indicates US children's size.

Baseball bats

The best baseball bat length depends on your comfort while swinging. If you are new to the game or want to resize, follow the steps below to measure yourself:

- With your arm straight out to your side, place one end of the bat in the centre of your chest. The other end of the bat should reach the tip of your outstretched index finger.
- Stand the bat upright on the ground and by your side. If your palm reaches the knob of the bat (the handle), the bat is the right size.

## Half-chaps

How to find the right size for your half-chaps:

- For greater precision, we recommend measuring while seated and while wearing your horseback riding pants and socks.
- Calf circumference: Measure the widest part of your calf using a measuring tape.
- Calf height: Measure from the top of your foot to your knee bone.

## Junior skis

If you are in between two sizes:

- Choose a shorter size if the child is at a novice level, is a cautious skier, likes to make quick short turns, or is still developing their ability to turn.
- Choose a longer size if the child's ability is advanced and/or the child likes to ski fast. Please note that we do not recommend going any longer than your child's suggested size range.

## Cross-country ski poles

How to choose the right ski poles:

- For skate skiing: the poles are longer to maximize push-off. SKATING cross-country ski poles should reach the skier's chin. You can also use this formula to choose the right pole: (your height in cm) x 0.89.
- For classic cross-country skiing: the poles are shorter. CLASSIC cross-country ski poles should reach the skier's armpit. You can also use this formula to choose the right pole: (your height in cm) x 0.83.

## Hiking poles

When choosing your hiking pole length:

- Make sure the hiking pole is touching the ground.
- While holding the pole's handle, bend your elbow 90 degrees.
- When hiking uphill, you'll want to shorten each pole by about 5-10 cm to allow for more leverage as you climb.
- When hiking downhill, you'll want to lengthen each pole by about 5-10 cm.
