

# NOTICE OF WORK

Area 1 - Tank Work

## Keeping the Parkland Burnaby Refinery Safe and Reliable

### Why?

We are performing abrasive blasting to prepare our new low carbon fuels storage tanks for coating/painting. Coating the tanks helps to prevent potential corrosion. There is a potential for noise to be generated during this work.

### When?

The anticipated start date is September 10, 2025, and expected to last 5-6 weeks.

### What do I need to know?

The blast material is safe and silica free, tanks will be covered, so no dust will escape.  
Pro-active noise monitoring and mitigation plans are in place.

Thanks for your patience and understanding.

We are committed to minimizing community impacts such as traffic and noise.

For inquiries or feedback, please contact us at: [CommunityBC@parkland.ca](mailto:CommunityBC@parkland.ca) or 604-257-4040.
