Don't chance a breakdown. Protect your equipment.

Regular maintenance of your propane equipment is a sound investment in your family's safety, comfort, and warmth. Ensure your equipment is working at their peak efficiency. Not only does regular maintenance increase the lifespan of your equipment, it can help you avoid or reduce the costs of repair in the event of an untimely breakdown.

We are committed to service

Let our team of qualified technicians look after your equipment for you.

Service Made Simple

1. Select the appliances you would like covered.

PropanePLUS+ covers all primary residential appliances including furnaces, water heaters, boilers, fireplaces and space heaters. (PropanePLUS+ does not include BBQ's, patio heaters, gas lighting or stand-by generators).

2. Maintenance made affordable.

- › Save on service calls, after-hours service and accessories.
- › Receive a discount rate when you add additional appliances to your maintenance plan
- › Regular furnace or fireplace cleanings are available on request

3. Your PropanePLUS+ Annual Appliance Inspection includes:

- › Test safety controls
- › Clean ignition / Pilot assembly
- › Examine heat exchanger (appliance dependant)
- › Clean burner assembly (appliance dependant)
- › Measure temperature rise
- › Tighten electrical connections
- › Measure input voltage
- › Clean condensate drains
- › Check clearance to combustibles
- › Measure gas pressure
- › Test ignition cycle
- › Vacuum and examine inner cabinets
- › Check venting components
- › Check gas connections
- › Apply maintenance decal / tag
- › Perform combustion analysis
- › Monitor Flame Rod Voltage
