

**keyrus**  
make data matter

Company Profile

“do what you do best and  
outsource the rest”

# 5 reasons to outsource to Keyrus:

## 1. We are experts in modern data architecture.

We implement the most effective technology solutions across all layers and stages of your data journey.

## 2. We think global, act local.

Our local team draws on extensive experience of our teams around the world. However, we deliver a locally based hands-on service by experts who become an extension of your team.

## 3. We are driven by our customer' success.

We service over 20 of the top 100 JSE listed companies across all industries, many of which have [publicly testified to our significant contribution](#) to future-proofing and increasing competitive advantage of their business.

## 4. We are technology tool agnostic.

Our technology competence spans all world-leading tools so we are well-positioned to recommend the most suitable solution for you. Our experts maintain the highest standard of technology skill certification.

## 5. We represent excellent value.

When engaging our team of experts you deploy a world-class level of skill, competence and experience in a flexible framework, so you and your internal teams can focus on creating value for your business.

## What makes us different

Keyrus is a global consultancy that develops data and digital solutions for performance management.

Combining business and technical expertise, we help companies like yours uncover the most value possible from data while optimising digital strategy and customer experience.
