### How did the Fund perform during the reporting period?

The Fund's performance for the year ended June 30, 2025, was materially impacted by interest rate movements across the yield curve and the performance of corporate bonds relative to treasuries. The Fund's investments slightly underperformed its benchmark net of fees, but outperformed gross of fees during the period. The Fund benefited from an overweight to corporate bonds and a significant underweight to treasury bonds as corporate bonds outperformed treasuries. The Fund's investments in corporate bonds also outperformed the performance of corporate bond allocations within the benchmark. Visit <https://www.eventidefunds.com> for more recent performance information.

### How has the Fund performed over the last ten years?

The Fund's past performance is not a good predictor of how the Fund will perform in the future. The graph and table do not reflect the deduction of taxes that a shareholder would pay on fund distributions or redemption of fund shares. In connection with new SEC Rules on shareholder reporting, the Fund's performance information above is compared with a broad-based benchmark, Bloomberg US Aggregate Index, which represents the overall domestic bond market. In addition, the strategy benchmark, Bloomberg 1-5 Year Gov/Credit Index, is included as the adviser believes it is more representative of the fund's investment universe.
