INVESTMENT STRATEGY

The Eventide High Dividend ETF, the "Fund" or ELCV, is designed to provide a high dividend yield by investing in companies that we believe are resilient, offer attractive dividend yields, and serve their stakeholders well.

The Fund seeks to invest in companies providing long-term solutions necessary to human flourishing, while also delivering robust and stable dividend yields. Given this, the strategy invests in areas of the market offering attractive yield, including sectors like energy, utilities, industrials, technology, infrastructure, and real estate.

The number of holdings will likely range from approximately 30 to 50, resulting in a high conviction portfolio of high-quality, dividend-paying companies across a variety of sectors.
