

Eventide High Dividend ETF

Fact Sheet

June 30, 2025

The **Eventide High Dividend ETF** (the "Fund" or "ELCV") is designed to provide a high dividend yield by investing in companies that we believe are resilient, offer attractive dividend yields, and serve their stakeholders well.

The Fund's investment objective is to seek income, income growth, and long-term capital appreciation.

The Fund seeks to invest in companies providing long-term solutions necessary to human flourishing, while also delivering robust and stable dividend yields. Given this, the strategy invests in areas of the market offering attractive yield, including sectors like energy, utilities, industrials, technology, infrastructure, and real estate.

The number of holdings will likely range from approximately 30 to 50, resulting in a high-conviction portfolio of high-quality, dividend-paying companies across a variety of sectors.

Current performance may be lower or higher than the performance data quoted. For the most recent month-end performance, please call 1-877-771-EVEN (3836) or visit the Fund's website at www.EventideETFs.com. The ETF's net asset value, market price and returns will vary. Investors could lose all their money on their investments. There is no guarantee that the ETF will achieve its objective. ETF shares cannot be purchased or sold at NAV. They are bought and sold at a market price based on the price of the last reported trade on the ETF's primary exchange, NYSE Arca, and may trade at a premium or discount to their net asset value. ETFs are not individually redeemed from the issuer. ETF redemptions are limited and commissions are often charged on each trade.

1. The returns shown do not reflect the deduction of taxes that a shareholder would pay on fund distributions or on the redemption of fund shares. Because of ongoing market volatility, fund performance may be subject to substantial short-term changes.
2. The net asset value (NAV) is the value of one share of the Fund as of the date listed. The NAV is the value of a Fund's assets, minus the value of its liabilities. NAV does not take into account any initial sales charges that may apply when shares are purchased or redemption charges when shares are sold. Because ETFs

trade like stocks at current market prices, shareholders may pay more than the Fund's NAV when purchasing Fund shares and may receive less than the Fund's NAV when selling Fund shares.

3. The official closing price as of the end of the business day noted, from the primary listing exchange. The primary listing exchange for the Fund is the NYSE Arca exchange.
4. The Bloomberg US 1000 Value Total Return Index provides exposure to companies with superior value factor scores based on their earnings yield, valuation, dividend
