

Eventide High Dividend ETF Fact Sheet

March 31, 2026

The **Eventide High Dividend ETF** (the "Fund" or "ELCV") seeks to provide a high dividend yield by investing in companies that we believe are resilient, offer attractive dividend yields, and serve their stakeholders well.

The Fund seeks to invest in companies providing long-term solutions necessary to human flourishing, while also delivering robust and growing dividend yields. Given this, the strategy invests in attractive areas of the market, including sectors like energy, utilities, industrials, technology, infrastructure, and real estate.

The number of holdings will likely range from approximately 40 to 60, resulting in a high-conviction diversified portfolio of high-quality dividend paying companies.

The performance data quoted represents past performance. Past performance does not guarantee future results. Current performance may be lower or higher than the performance data quoted. For the most recent month-end performance, please call 1-877-771-EVEN (3836) or visit the Fund's website at www.EventideETFs.com. The ETF's net asset value, market price and returns will vary. Investors could lose all their money on their investments. There is no guarantee that the ETF will achieve its objective. ETF shares cannot be purchased or sold at NAV. They are bought and sold at a market price based on the price of the last reported trade on the ETF's primary exchange, NYSE Arca, and may trade at a premium or discount to their net asset value. ETFs are not individually redeemed from the issuer. ETF redemptions are limited and commissions are often charged on each trade.

- The Bloomberg US 1000 Value Total Return Index provides exposure to companies with superior value factor scores based on their earnings yield, valuation, dividend yield, and growth.
- The returns shown do not reflect the deduction of taxes that a shareholder would pay on fund distributions or on the redemption of fund shares. Because of ongoing market volatility, fund performance may be subject to substantial short-term changes.
- The net asset value (NAV) is the value of one share of the Fund as of the date listed. The NAV is the value of a Fund's assets, minus the value of its liabilities. NAV does not take into account any initial sales charges that may apply when

- shares are purchased or redemption charges when shares are sold. Because ETFs trade like stocks at current market prices, shareholders may pay more than the Fund's NAV when purchasing Fund shares and may receive less than the Fund's NAV when selling Fund shares.
- The official closing price as of the end of the business day noted, from the primary listing exchange. The primary listing exchange for the Fund is the NYSE Arca exchange.
- Active Share is the percentage of fund holdings that is different from the benchmark holdings. A higher percentage indicates a greater difference from the benchmark.
