QUALITY

How we identify Global Stars

Finding the best stocks with our 3-pillar process

Robeco Sustainable Global Stars doesn't select stocks based on hype, sector or geography – we only focus on quality via three key pillars:

VALUATION QUALITY

High Free Cash Flow

We evaluate free cash flow (FCF) because 'earnings are opinions, cash is a fact'. Ultimately, using ROIC and FCF as criteria to select stocks delivers relatively stronger investment performance over time.

FINANCIAL QUALITY

High Return on Invested Capital (ROIC)

We assess how effectively a company uses capital to generate profits via measuring return on invested capital (ROIC).

SUSTAINABILITY QUALITY

Material ESG Factors & Integrated Valuation

We evaluate ESG factors to understand their impact on companies' ability to generate value. Robeco's sustainability analysts independently assess companies opportunities and risks through use of ESG factors, providing a more holistic understanding of a company's risk profile, adding to our traditional fundamental analysis. This helps our portfolio managers make better decisions.

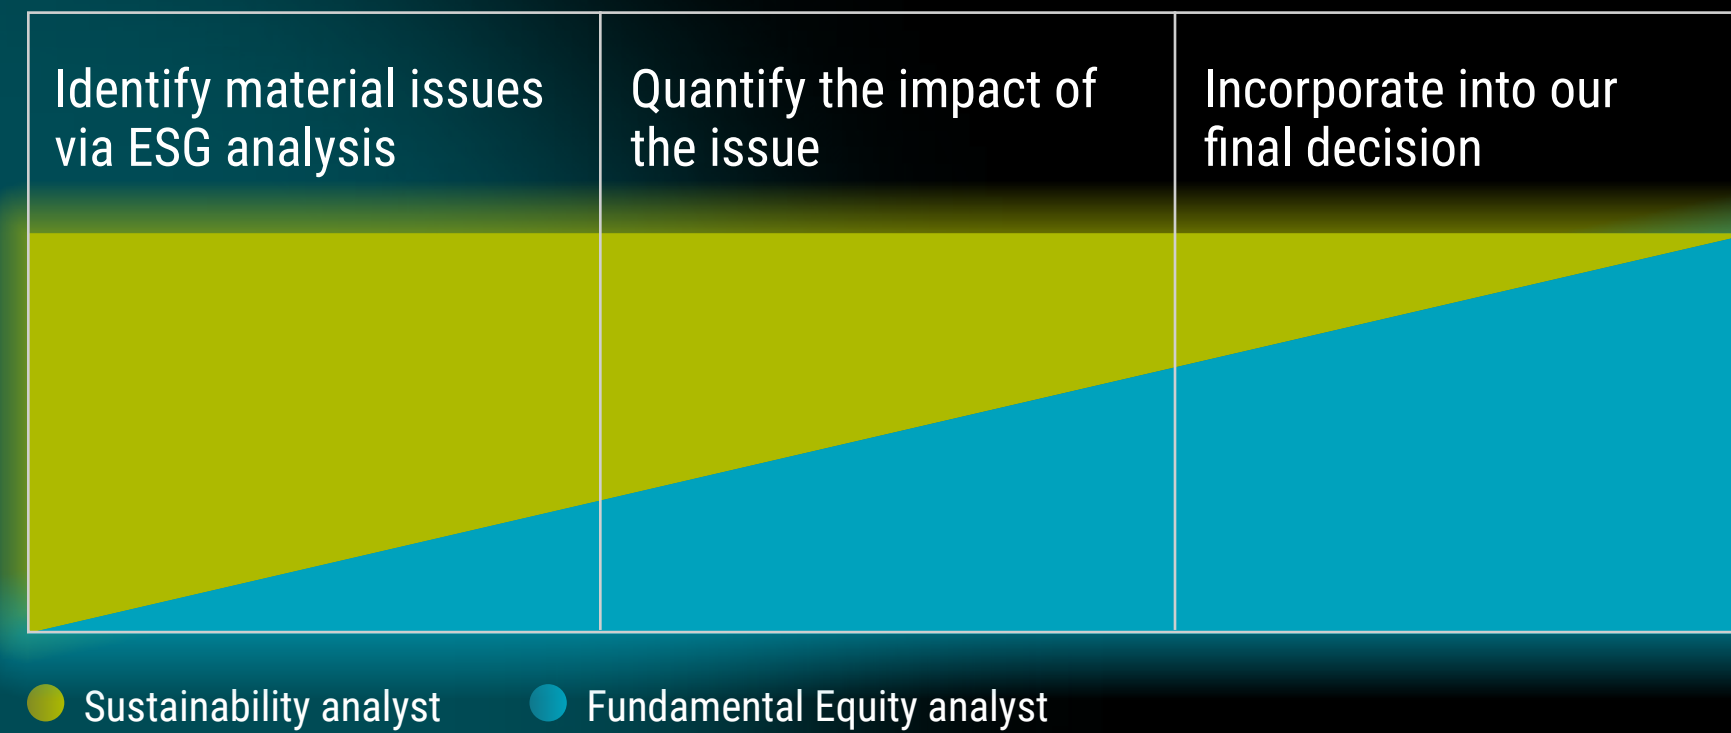

Combining ROIC and FCF delivers superior performance

Building a balanced portfolio

THE STYLE SPECTRUM

Using our quality focus, Sustainable Global Stars invests in stocks across the style spectrum. This is unlike a growth investing style, for example, which involves only purchasing companies that are growing fast in terms of revenue, earnings or market share, and are typically trading at a higher level than the broader market valuation. It is also different from value investing, which focuses on buying stocks that appear to be undervalued by the market, with the view that their true value will eventually be recognized.

Sustainable Global Stars is broadly diversified over the style spectrum.

PERFORMANCE

Beating the index since day one
