

Krux

Where Exploration Drilling & Analytics Meet

You can't manage what you don't measure

Our customized software consolidates the collection, storage and analysis of exploration drilling data giving you easy, secure access to the information you need for quality decision making.

Our software enables your business to:

Secure your data

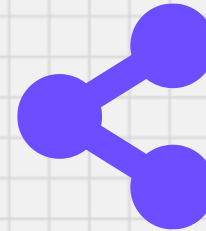

Use data to
make better
decisions

Save time and
resources

See the big
picture of your
information

Create synergies
by removing
data silos

Prepare to
evolve using
data

- Shared Dataset, Single Source of Truth

From first contact to implementation in less than 1 week

1

Configure the base software.

- Design your templates for daily shift report and timesheet activities
- Populate your dropdown menus
- Add your contract details
- Setup your user accounts

2

Implement.

- Download the App on field devices
- Educate your trainers with our online or onsite training programs

3

Start measuring.

- Begin entering daily shift reports and timesheets in the field
- Service Provider edits and validates reports prior to sending to Resource Company
- Resource Company reviews and approves

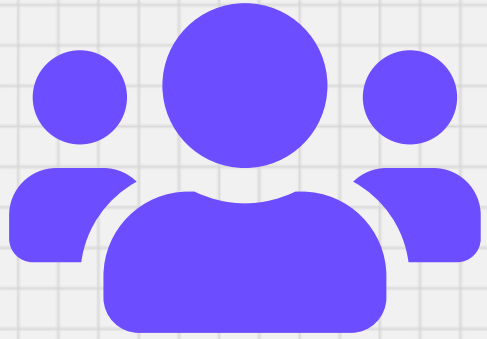

4

Start managing.

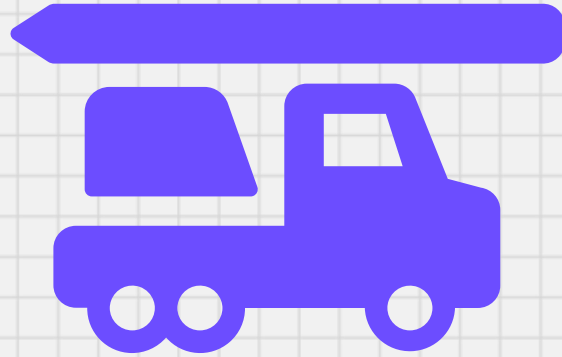

- Review your costing on an aggregated or activity based level
- Review operational performance
- Analyze bit life
- View of data across multiple divisions consistently
- Create drilling plans and track progress
- Set and review contract KPI's
