

Luke Tuttle

Chief Product and Technology Officer

About Luke Tuttle

Luke Tuttle is the Chief Product and Technology Officer of MoneyGram, where he leads the teams responsible for building and enhancing products and technology. In this role, he drives cross-functional collaboration to deliver exceptional customer experiences. Luke first joined MoneyGram in February 2025 as Chief Technology Officer, overseeing engineering, platform operations, information security and emerging technologies like blockchain.

Background & Experience

With over 20 years of experience at the intersection of fintech, adtech and commerce, Luke has held engineering leadership and architectural roles at industry giants such as Klarna, Experian and eBay. Most recently, he served as President and CTO at Multichannel Consulting.

Some of his notable career achievements include launching Klarna's fintech products in North America, developing and launching Klarna's Retail Media Network, digitally transforming BMW Financial Services' front office, and driving the commercial transformation of MODIFI in North America.

Additionally, Luke played a pivotal role in leading technology at ClearSaleing through its acquisition by GSI Commerce, assisting READY Robotics in closing its Series B funding round, and spearheading technology transformations at Huntington National Bank and Big Lots. Luke holds a Bachelor of Science in Computer and Electrical Engineering from Carnegie Mellon University.
