## THE STORY

This construction company has over 30 years of experience, offering top quality supply and build services for all types of brick, block and stonework. They've grown their turnover by 70% since 2018, on the fast track to breaking the £1m barrier by the end of this year.

When they got in touch with their Barclays RM, they needed a working capital injection within a week at the latest. They'd just won several big contracts, all with fortnightly invoicing cycles and 30-day payment terms. With wages to pay and upfront costs to cover in between, they had to bridge their cash flow gap fast.

On Friday afternoon, within a couple of hours of the referral, the business and their RM hopped on a 3-way call with MarketFinance. By Monday morning the business had already submitted their documents, funding their first invoice before the end of the week.
