THE STORY

This business specialises in temporary staffing for care homes and local authorities. They supply registered nurses and skilled healthcare professionals who help manage and coordinate recovery at home.

The business pays wages weekly, which helps them attract and retain the best possible temporary staff. But the local authorities they supply to pay on 30-day terms so the business needs funding to cover payroll in between.

Barclays and MarketFinance worked together on a flexible solution the business can use to selectively fund invoices for 2 of their debtors. With a TCR (Temporary and Conditional Release) executed quickly, the business now has a facility that works alongside their overdraft and helps them continue doing good for their community.
