

DeliverZero offers to-go containers that are reused rather than thrown away. It's cheaper for restaurants than traditional containers and easy to use for restaurants and customers!

## DeliverZero Makes Reuse Easy for Restaurants

1. When DeliverZero onboards a restaurant, they determine the number of containers used to package each menu and the average order volume.
2. When the containers leave the restaurant, DeliverZero's tech tracks the container. There are no additional steps required from restaurants.
3. DeliverZero tracks containers leaving a restaurant and the number of containers in-stock at any given time. DeliverZero will restock restaurants as frequently as needed.
4. DeliverZero offers dishwashing services for restaurants that do not have in-house dishwashing capacity or simply want to take advantage of the white glove service.

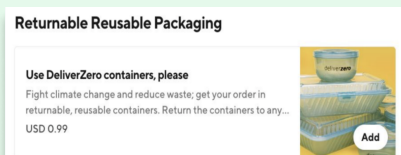

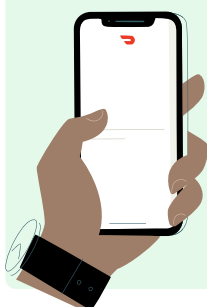

## Benefits of Offering Reusable Packaging

- **Save money:** Save over 40% on packaging costs for every order in DeliverZero containers.
- **Attract more customers:** 86% of customers order from restaurants they never tried before because of DeliverZero.
- **Attract higher value customers:** DoorDash customers that add DeliverZero to their cart spend \$10-11 more per order.
- **Reduce Waste:** We make it easy for restaurants to reduce waste and the GHG emissions & water usage associated with single-use.

## DeliverZero Integrates with DoorDash

- Restaurants offer DeliverZero as a menu item that customers can add to their order.
- DeliverZero's integration tracks container usage, inventory, and returns.
- Customers can participate without signing up for DeliverZero or leaving DoorDash's platform.

## Pricing

There is no upfront charge for containers. Restaurants only pay for containers that are used, and are charged on a monthly basis. Container usage fees are based on servicing level:

**\$0.10** If restaurants handle dishwashing

**\$0.25** If DeliverZero handles dishwashing
