

Pegasus Series Payments + Loyalty Tablet

Powering customer-led growth through payments

The Pegasus Series Payments & Loyalty Tablet is the centerpiece of Fivestars by SumUp's integrated Pay + Loyalty platform – an innovative software and hardware combination that brings the power of our industry-leading loyalty and acquisition platform to PCI-compliant payment hardware.

First, the essentials – Integrators and POS systems remain *completely* out of PCI scope by leveraging our semi-integrated API framework.

Second, the upside – We engage each and every customer during the transaction flow and use omni-channel tokenization to assign a unique “fingerprint” for each payment card presented into our system. This lets us securely power a unique sign-in and marketing experience for each customer that drives loyalty adoption at 10x the rate of our closest competitor. As such, the Pegasus Series Payments + Loyalty Tablet throws the idea of a payment terminal as a fee-center onto its head by transforming it into an engine for growth.
