

Cookie Policy

Cookies are small text files that are stored on the hard disk of your computer, smartphone, tablet or other devices by the websites that you visit. They are widely used to make websites work, or work more efficiently, as well to provide information to the owner of the website

Cookies can serve different purposes, such as:

- cookies which allow the good functioning of a website or an application.
- cookies which allow for certain preferences or histories to be saved so that you can easily navigate the website without having to reintroduce such information in a future visit (remembering the language chosen, the user names, passwords, etc.).
- cookies which may analyze your behavior on the website to better understand your needs, adapt our website accordingly and provide you with a better user's experience (which pages did you consult and for how long, number of visits of the website, from which location, etc.).

By lifespan, a cookie is either a:

- session cookie: which is erased when the user closes the browser; or
- persistent cookie: which remains on the user's computer/device for a pre-defined period of time, until a new version of the cookie is installed or until you manually delete it

Cookies are currently not implemented on the Arvestar Asset Management NV/SA Website. The Website may however use cookies in the future to improve the navigational experience by keeping a record of certain data (this avoids you having to reintroduce this data each time you visit the Website) and by tailoring the content of the Website to your preferences.

You may, at any time, delete or block cookies in your browser parameters. However, some of the Website's features which would require the use of these cookies would no longer be available to you.
