- About the Author

Overview

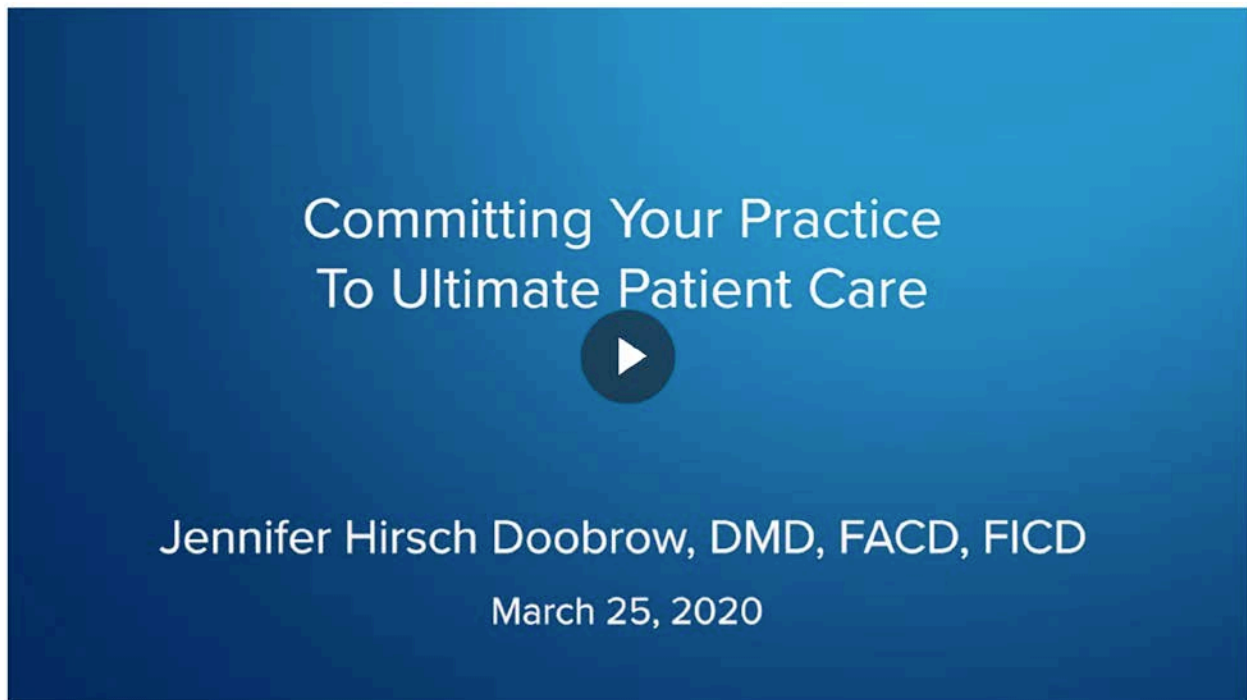

This dynamic and energizing presentation emphasizes the interdisciplinary team approach to ultimate patient care. Defining your practice and developing effective strategies for patient communication to enhance case presentation and case acceptance is the key to differentiating your practice in our challenging economic environment. Emphasis will be placed on elevating the entire dental team as a key partner in care from tooth preservation to tooth replacement. A highlight of this program will be discussing numerous advancements in treatment modalities for periodontal, regenerative and implant therapies that all have a significant impact on Comprehensive Care Dentistry. Building a solid foundation is essential to your patients' long-term-success!

Learning Objectives

Upon completion of this course, the dental professional should be able to:

- Understand the impact that interdisciplinary care plays in a positive patient experience.
- Highlight the benefits of growth factors in hard and soft tissue regeneration.
- Develop an action plan and decision tree to promote comprehensive patient care.
