Terms of Reference: Software Development Consultant

Position Title: Software Development Consultant

Duty Station: Fuvahmulah City Council

Type: Contractual (1 Year)

Introduction

Fuvahmulah City Council seeks to hire an energetic, self-motivated, organized, and enthusiastic individual to contribute in Software Development.

Objective

To design, develop, and maintain scalable web applications and backend systems that streamline council operations and enhance digital service delivery for residents and internal stakeholders.

Scope of Work

Application & System Development

- Develop and maintain full-stack web applications with modern frontend **JavaScript frameworks** (React, NextJS), and robust backend architectures using **Node.js**, **Golang** or **Laravel**.
- Collaborate with council sections to understand user requirements and translate them into technical specifications.
- Build APIs and microservices to integrate with council portals (e.g., afunCity), databases, and third-party services.
- Develop internal dashboards, citizen engagement platforms, and modular services for council workflows.
- Design and develop high-performance mobile applications using native technologies or cross-platform frameworks like Flutter or React Native, ensuring seamless functionality on both iOS and Android platforms.
- Write and maintain documentation, including codebase, design, and architecture of all software/applications developed.
- Troubleshoot technical issues with systems in use and ensure timely updates
- Carry out additional tasks assigned by the council related to the scope of work.

Code & Infrastructure Management

- Ensure code quality through version control (e.g., Git), automated testing, and CI/CD pipelines.
- Deploy and maintain applications across on-premises and cloud environments (e.g., Docker, Kubernetes, DigitalOcean).
- Implement authentication, access control, and security best practices across all applications.
- Participate in architectural decisions, data flow optimization, and scalability improvements.

Maintenance & Support

- Monitor performance, diagnose issues, and apply timely bug fixes and system updates.
- Document system configurations, codebases, and deployment strategies.
- Provide technical support for IT staff and user training when rolling out new features.
- Assist in disaster recovery, backup strategies, and data resilience planning.

Qualifications & Experience

- The maximum acceptable price for the consultancy cannot be more than MVR 25000 per month.
- Experience with RESTful APIs, PostgreSQL/MySQL, and NoSQL databases like MongoDB.
- Familiarity with containerization (Docker), mobile deployment workflows, and secure app architecture.
- Strong grasp of cross-platform UI/UX best practices.
- Experience with containerization and cloud technologies is highly desirable.
- Strong understanding of cybersecurity protocols and user authentication systems.
- Excellent communication skills and a collaborative spirit.

- The applicant can be a team of developers or an individual.

Requirements & Compensation

- The maximum acceptable price for the consultancy cannot be more than MVR 25000 per month.
- **Monthly Workload:** The consultant is expected to complete a total of 170 working hours per month.
- **Scheduling:** The consultant is expected to work within a schedule which the Council determines.
- **On-site Work:** The consultant will be required to work on-site and off-site.
- **Approval & Payment:** Compensation will be based on the hours of work approved by the supervisor. Only tasks reviewed and approved within the scope of work will be billable.
