# Expert Review Panel Members (FY25-26)

To ensure we fund the best quality science and researchers, we operate a rigorous review process to make funding decisions.

We ask external, independent, leading scientists, clinicians, health policy specialists and patient representatives to sit on our expert review panels and funding committees to review applications submitted to us. Only with the expertise and commitment of our research community who participate in our independent peer review, can we continue to accelerate progress against cancer. For this we are extremely grateful.

Listed below are the experts in alphabetical order by surname who served on our Expert Review Panels in FY2025-2026.

Members of our funding committees who also served on expert review panels may not all be included in this list. These members can all be found on the relevant [committee pages](#).

# About Cancer Research UK

We're the world's leading cancer charity dedicated to saving and improving lives through research. We fund research into the prevention, detection and treatment of more than 200 types of cancer through the work of over 4,000 scientists, doctors and nurses. In the last 50 years, we've helped double cancer survival in the UK and our research has played a role in around half of the world's essential cancer drugs. Our vision is a world where everybody lives longer, better lives, free from the fear of cancer.

Cancer Research UK is a registered charity England and Wales (1089464), Scotland (SC041666), the Isle of Man (1103) and Jersey (247).
