

# Cancer Research UK: e-learning and resources for healthcare professionals

Doctors.net.uk is a free, online platform for medical doctors to communicate and connect, keep up to date with the latest news and CPD resources. Doctors.net.uk hosts our Cancer Learning Centre which gives GPs access to a variety of accredited resources to support GPs in recognising potential signs/symptoms and refer patients in a timely manner.

NB Medical is a private primary care education provider – hosting webinars, courses, reference books and online modules. Through NB Medical we deliver regular, free webinars for GPs to enhance their knowledge on latest statistics, risk factors and when to refer patients if cancer is suspected. These webinars are delivered by their GP Dr Kate Digby and often joined by a guest speaker with an interest in the topic.

Cancer Research UK also provides primary care professionals with information designed to support the timely recognition, referral and management of suspected cancers, and informed participation in cancer screening.

We share best practices, underpinned by evidence and clinical guidelines, through a variety of webpages and materials.

All our information is housed on the [Health Professional Hub](#). We've highlighted key pages and resources below.

<b>Resource</b>	<b>Nation</b>	<b>Description</b>
<a href="#">GP Contract Hub</a>	England	Information to support GP practices and PCNs to deliver on their GP contract requirements for the early diagnosis of cancer.
<a href="#">Cancer screening</a>	UK-wide	A hub that provides an overview of the UK's cancer screening programmes and how primary care professionals can tackle barriers and inequalities to support informed participation. It contains pages dedicated to bowel, breast, cervical and lung screening. These provide screening uptake data, GP resources, a summary of evidence-based interventions to improve uptake, and information on screening optimisation.
<a href="#">Primary care</a>	UK-wide	A hub of information, news, research and resources on efforts to support earlier

---

		cancer diagnosis. We've highlighted key pages from this section below.
<a href="#">Suspected cancer referral guidelines</a>	UK-wide	An overview of suspected cancer referral guidelines and resources to support their implementation, such as our NG12 and SRG interactive symptoms guides and 'body' infographics.
<a href="#">Safety netting</a>	UK-wide	A practical overview of safety netting patients with suspected cancer symptoms. It provides patient communication tips, information on safety netting mechanisms and GP resources.
<a href="#">Investigations</a>	UK-wide	A section dedicated to key tests used by health professionals to investigate patients with suspected cancer. Visit for information on <a href="#">Faecal Immunochemical Test</a> , <a href="#">colon capsule endoscopy</a> , <a href="#">PSA testing</a> , and <a href="#">capsule sponge testing</a> .
<a href="#">GP Insight Guides</a>	UK-wide	Concise guides to support primary care professionals recognise, refer and manage people with suspected cancers. There are guides on lung, skin, oesophageal, and bladder & kidney cancers.
<a href="#">Overview of Clinical Support Decision Tools</a>	UK-wide	Tools to help support GPs with patient management decisions.

---

---

<a href="#">Lung cancer</a>	UK-wide	Information to support GPs with the timely recognition and referral of patients with suspected signs and symptoms of lung cancer.
<a href="#">Remote consultations</a>	UK-wide	A summary of the latest evidence, tools and resources to help GPs get the most out of remote consultations.
