

EvoScient Appetite Control*

EvoScient Appetite Control* combines four ingredients (WellTrim® iG African Mango Seed Extract, Brown Seaweed, Green Coffee Bean Extract and Green Tea Extract) that work synergistically to help break through weight loss barriers.*

EvoScient Appetite Control* supports:

- Thermogenesis*
- Metabolic hormones Leptin and Adiponectin*
- Appetite control*
- Healthy blood sugar levels and reduced cravings*
- Proper fat metabolism*

WellTrim® African Mango (*Irvingia gabonensis*)

African Mango (*Irvingia gabonensis*) is a fruit found and grown in West Africa. The extract derived from the seed has been shown to support weight management through appetite suppression and increased metabolic rate.* It works to support the enzyme glycerol-3-phosphate dehydrogenase, which is known to be a major factor in converting glucose to stored fat. It uses its unique properties to support the function of Leptin and Adiponectin, which help to reduce the conversion of complex carbs into sugars. Leptin and Adiponectin also support fat burning and hunger management.* WellTrim® iG is a trademarked and patented extract of *Irvingia gabonensis* that is a clinically proven ingredient that supports multi-functional weight management activity.*

Brown Seaweed

Brown Seaweed contains a carotenoid, fucoxanthin, that may serve as a thermogenic antioxidant, supporting healthy metabolism.* It appears that fucoxanthin is stored in fat cells and may support normal fat cell differentiation and proliferation.*

Green Coffee Bean Extract contains two important polyphenolic compounds- caffeic and chlorogenic acids. Caffeic acid provides a safe energy boost while being naturally low in caffeine.* Chlorogenic acid helps to slow the release of glucose into the bloodstream after a meal and reduce the absorption of dietary fat.* It also works to support the rate of body fat production by supporting favorable changes in the enzyme glucose-6-phosphatase, which in turn balances glucose production in the liver. Green Coffee Bean Extract supports free radical scavenging and supports metabolism in order to burn a higher proportion of lipids to carbohydrates.*

Greenselect® Green Tea Phytosome™

Greenselect® Green Tea Phytosome™ has been extensively studied for its antioxidant activity and for weight loss support.* A 20% increase of the antioxidative capacity was observed in volunteers treated with Greenselect® Phytosome™.*¹ GreenSelect® has also been studied with respect to its effects on body composition, in conjunction with diet and lifestyle changes. In both clinical trials, GreenSelect® exhibited beneficial activity regarding metabolic health markers.*^{2,3}

SUPPLEMENT FACTS

Serving Size: 2 Capsules

Amount Per Serving

Green Coffee Bean Extract	300 mg
Brown Seaweed (<i>Laminaria japonica</i>) Whole Plant Extract	200 mg
WellTrim® iG (IGOB131®) African Mango (<i>Irvingia gabonensis</i>) Seed Extract	150 mg
GreenSelect® Green Tea (<i>Camellia sinensis</i> leaf extract/ Phosphatidylcholine complex)	150 mg

Other ingredients: hypromellose (capsule), microcrystalline cellulose, vegetarian leucine.

Warning: If pregnant or nursing, consult your healthcare practitioner before taking this product.

Suggested Use: As a dietary supplement, take 2 capsules daily, or as directed by your healthcare practitioner.
