

Sophisticated, Yet Surprisingly Simple

SmartBox+™ represents an evolution in prescriptive application, using SmartBox+ transfer containers to accurately apply a variety of products. The improved auger meters and the intuitive ISO-based user interface of SmartBox+ maintain a completely closed delivery system to protect farmers and the environment.

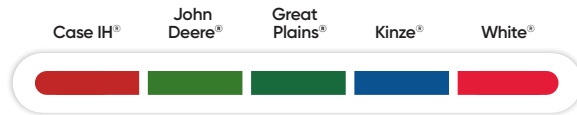

Accurate Down to the Granule

SmartBox+ contains both metering and flow-sensing functions that ensure accurate application at a wide range of rates and speeds. Through patented, state-of-the-

art meters, SmartBox+ will put your mind at ease, knowing you're applying exactly what you need, precisely where you need it – and you'll have the as-applied data to prove it.

SmartBox+ Works with Any Planter

And many more!

SmartBox+ is as versatile as it is effective. No matter which planter you use – from **Case IH®** to **John Deere®** to **Great Plains®** to **Kinze®** to **White™** – there's a bracket to fit it.

Closed System for Safe Handling

SmartBox+ uses a closed-application system to minimize operator exposure while ensuring the system accurately delivers labeled rates.

powered by

SIMPAS®
Prescriptive
Technology

SmartBox+ uses patented SIMPAS prescriptive application technology to map and apply an agronomic prescription to spatially-distinct problem areas in each field. Issue-specific prescriptions are developed by agronomists using a variety of factors such as sampling, sensing, historical yield data, elevation, topography and imagery. The prescription is then easily uploaded into the ISO-based display that controls the SmartBox+ system.

This prescriptive technology then enables the SmartBox+ system to dispense the targeted crop input product at the specific rate at geo-referenced locations throughout each field.

Sleek and Precise

SmartBox+ uses a full-color touchscreen display with industry-standard ISO connections and a USB port for easy data transfer. Swath control comes standard, removing the guesswork associated with row shutoffs. The user-friendly, intuitive menu allows you to set rates by individual row and is compatible with both 12V and 24V.

Trimble Does It All

Trimble® makes it easy to get going with SmartBox+. Your local dealer will take care of everything, including purchase, setup and service.
