

Stonemason Fact File – Part B

The intention of this document is to provide stonemasons with basic specifications for areas within each cemetery managed by the Greater Metropolitan Cemeteries Trust. It remains a stonemason's responsibility to check a site and ensure the proposed memorial fits within the boundaries of the plot and suits the harmony of the area.

All measurements provided are in millimetres (mm).

Stonemasons/contractors must check-in with the regional works co-ordinator specified on the issued permit **prior to** starting any work within GMCT cemeteries and have a copy of their permit available at all times when on GMCT property.

All memorial construction should be done so in accordance with the following Australian Standards:

- AS 4204-2019 – Headstones and cemetery monuments
- AS 4425-2020 – Above ground burial structures
- AS 3700-2018 – Masonry structures

For areas not appearing in this document or any other enquiries, please contact the stonemasons dept on 0438 472 049 or email to stonemasons@gmct.com.au.
