Quality Control

Documentation

Provide visuals of the project.

To do | Priority: Low | Due: 19.03.2026 14:00 PST | Created by: SafetyCulture Staff

Photos

Provide photos as necessary, especially for field testing.

Introduction

Purpose of the plan

Double check the quality of renovated fixtures, particularly for the electrical wiring and new materials used in building.

Overview

Electricians need to go over the wiring to ensure it is placed properly after doing renovations within the project. Project manager needs to check the materials and make sure they are up to standard.

Organizational Chart

	Task authority	Task responsibilities
1	Electricians	Check the wiring and other electrical fixtures.
2	Project Manager	Check the materials used during the renovations. Ensure if they're up to standard with client expectations.

Quality Planning

Identify which of the following standards are relevant to the project and describe how to address them.

Project structure

N/A

Process control testing

Follow standard procedure for process control.

Inspections/control procedures

Follow standard procedure for checking electrical wiring.

Production phases

N/A

Subcontractors and suppliers

To follow.

Manufactured materials

Ceramic tiles for renovation.

Quality Control

1 action

Identify which of the following actions are relevant to the project and describe how to implement them.

Field testing procedures

Visual Inspection
Earth Continuity Test
Insulation Resistance Test
Leakage Test
Further tests have to be performed on leads, RCDs etc

Submittals

To follow.

Documentation

Provide visuals of the project.

To do | Priority: Low | Due: 19.03.2026 14:00 PST | Created by: SafetyCulture Staff

Photos

Provide photos as necessary, especially for field testing.

Revisions to work on

To follow.
