Re: Acknowledgment of Receipt, 2410 Miramichi Avenue, Bathurst, NB, PID 20033593

Mr. Bondok,

The purpose of this letter is to inform you, the Responsible Party, that the Closure Report (dated June 28, 2021), and Record of Site Condition (signed June 25, 2021) as prepared by Scott Conrod of Golder Associates Ltd., on your behalf, have been received by this Department.

These documents have been processed to ensure consistency with the Management Process as outlined in the current version of the ***Guideline for the Management of Contaminated Sites*** and have been found to meet requirements. The site has been evaluated and/or remediated to a degree acceptable to the Minister based upon the conclusions and opinions of the Site Professional, as stated in the Closure Report and Record of Site Condition. Notwithstanding this, the Minister reserves the right to reevaluate the site should there be an increase in contamination or a change in site conditions, activities, or circumstances which may pose a risk to human health or the environment.

The Minister has not supervised the work undertaken at the site and therefore does not assume any responsibility or liability for this work. Furthermore, the Minister is not responsible for notifying present or future site owners/occupants of the work completed. Any persons intending to purchase or occupy property should make their own independent determination of the environmental condition and the extent of liability, which may arise from taking ownership or occupancy.

This Acknowledgement of Receipt officially completes the Management Process.

As the Responsible Party, you are required to ensure that the Site Professional decommissions any monitoring wells, if present, as soon as is practicable. The Site Professional must follow the DELG Guidelines for the Decommissioning (abandonment) of Groundwater Wells and Boreholes (dated March 2021) and must also submit written confirmation, with details of the well decommissioning, to this Department upon completion of this action.

Should you require further assistance, please contact the Department of Environment and Local Government at (506) 453-7945.

For Minister
Environment and Climate Change

- C. Lori Ramsay, Remediation Administrator, Authorizations Branch (*email*)
