Equip your students for **automation**

The Make Academic Alliance helps university and high school teachers give their students the skills necessary to thrive in a changing global marketplace.

Enhance your classroom with fun, technology-driven learning experiences suitable for any discipline or skill level.

Teaching events

Teacher training sessions to help you get started with Make.

Workshops that unite academic and business partners from across the globe.

Support and collaboration to organize student hackathons and bootcamps.

Learning resources

Structured rewards with free e-learning, badges and certificates.

Make's Resource Hub with tutorials, use cases and templates.

Guest lectures and masterclasses, virtual or in-classroom, in your chosen language.

Dedicated support from an Academic Alliance Manager.

Exclusive Make access

Free premium access to Make for teachers and students throughout a course's duration.

Free premium access for researchers across disciplines.

Nurture real-world success through hands-on learning

Foster innovation and creative thinking by helping students acquire crucial business-related skills and learn process automation concepts. Students with the Make Academic Alliance can earn badges and certificates for their achievements while leveraging Make for personal projects.

> „This partnership was truly transformative for our students. They gained a profound understanding of the significance of process automation in driving business growth and efficiency."

Ashish Khandelwal
Assistant Professor, University of Illinois, USA
