

FINAL NARRATIVE REPORT

Guidelines on how to complete the activity report are included in italics.

Use the information included in your CESP Full Proposal (reproduced in Annex 1 of your CESP contract) as a baseline from which to complete this report.

Remember that this report will be made available on your project page on the GBIF website and therefore should not include any contact information, unless you have permission from all mentioned in the report that their contact information can be published.

2. Executive summary

Please provide a brief summary of your project's objective(s), its implementation and achievements. You should also describe the context and the approach taken for the final evaluation of your project, and the key best practices and lessons learnt identified. Remember to include any additional objectives that were defined during the implementation of the project and explain why they were added to the project's initial objectives. In the event of unexpected challenges that have prevented you from reaching a planned project objective, please provide explanations and indicate if and how you plan to reach these objectives post project.

(Max. 300 words)

[The "Data Use for Decision Making Workshop: an Iberoamerican community call" project tackles the challenge currently facing the Latin American region in terms of strengthening the links between science and public management with regard to the use of evidence to support decision-making and public policy making.

This project has managed to bring together countries and experts in the use of biodiversity data, who jointly proposed the reuse and adaptation of existing materials produced by the GBIF community in the framework of the IDB projects, to train key actors in the participating

countries in the methodologies and strategies to incorporate the use of the data, particularly those mediated by GBIF, in their workflows.

However, due to the global context of the pandemic, which forced the continuous restructuring of the project in time and form, moving from the original programming of a face-to-face workshop in April 2020 in Chile, then to a face-to-face workshop in December 2020, and finally to a completely virtual version for the second half of 2020, it was necessary to cancel the project.

However, the project partners are still working on achieving the objectives set out in the project, through their institutional guidelines.

This report documents the activities carried out within the framework of the project, up to the moment of its closure. Among the activities carried out are the definition of the contents to be taught in the workshop, the structuring of an information booklet containing the background of the project, programme, profile of the participant and expected learning outcomes. The process of calling and selection of candidates was also carried out.]

3. Progress against expected milestones

Please indicate the status of the expected milestones as outlined in Annex 3 of the contract, at the time of final reporting.

Please provide more information in the Deliverables table in section 5 of this report, including detailed explanatory notes in the event of unexpected delay(s).

Expected milestones	Completed? Yes/No
Kick-off virtual meeting held and report available. (Mid-term report milestone)	Yes
Existing workshop materials reviewed and adapted, and missing parts translated. (Mid-term report milestone)	No
Online sessions with instructors and organisers to prepare the workshop content held and reports available. (Final report milestone)	Yes
Call and selection of workshop candidates complete. (Final report milestone)	Yes
Pre-workshop online activities complete.	Yes

Expected milestones	Completed? Yes/No
(Final report milestone)	
Regional workshop on Data Use for Decision Making held and 'workshop memories' (text, slides, photographs and social media links) available. (Final report milestone)	No
Sessions with instructors and organisers to prepare a self-assessment held. (Final report milestone)	No
Completion of final capacity self-assessments. (Final report milestone)	No

4. Activities

Please indicate the status of the activities as outlined in your CESP Full Proposal (section 3.5), at the time of final reporting.

The table below should be completed in the same way as in your CESP Full Proposal, but should include information and updates on the status of each activity. Please indicate relevant source(s) of verification and provide links, or a copy of the source of verification mentioned if no links are available. Attachments should be provided in the Annex.

In the event of unexpected delay(s), please provide detailed explanatory notes and indicate new planned completion date(s).

Please include any additional activities completed during the implementation of the project that were not originally outlined in your CESP Full Proposal.

5. Deliverables

Please indicate the status of each of the planned deliverables as outlined in your CESP Full Proposal (section 3.6), at the time of final reporting, listing the related activities connected to these and explanatory notes. Please highlight any changes from the original plans.

The table below should be completed in the same way as in your CESP Full Proposal, but should include information and updates on the status of each deliverable. Please indicate and provide links to documents or webpages in the "Sources of verification" column, or a copy of the source of verification mentioned if no links are available. Attachments should be provided in the Annex.

In the event of identifying a deliverable as not completed, please provide detailed explanatory notes, % complete and expected completion date.

Please include any additional deliverables completed during the implementation period that were not originally outlined in your CESP Full Proposal.

6. Events organized as part of the project

Please indicate the status of the events as outlined in your CESP Full Proposal (section 3.7), at the time of final reporting.

The table below should be completed in the same way as in the CESP Full Proposal, but should include information and updates on the status of each event. Please provide links to any documents or web pages documenting the event(s) in the sources of verification. Attachments should be provided in the Annex

In the event of unexpected delay(s), please provide detailed explanatory notes and indicate new planned completion date(s).

Please include any additional events organized as part of the project that were not originally outlined in your CESP Full Proposal.

Add rows as required.

7.1. General comments on project implementation

(Max. 200 words)

[No general comments on project implementation]

8. Project communications and visibility

Describe the way the results of your project have been and will continue to be communicated and shared with the project stakeholders and broader GBIF community.

Please also review the page describing your project available from <https://www.gbif.org/programme/82219/capacity-enhancement-support-programme#projects> and highlight any additional documents, events, news items or links that you would like to add to your page and provide links/attachments in the Annex.

(Max. 300 words)

[No comments on communications and project visibility]

9. Monitoring, evaluation and lessons learned

Please indicate the results of the monitoring and evaluation, as outlined in your CESP Full Proposal (section 3.8), at the time of final reporting. Please return to the [capacity self-assessment](#)(s) that you completed as part of your project proposal and update it to reflect progress through your project.

Ideally this section should also include the following:

- An evaluation of the project activities and their outputs/deliverables*
- An assessment of the overall outcomes, impacts of the project and how it contributes to the overall objective of the CESP programme*
- A description of the results of the individual capacity self-assessments and the development of the institution in comparison to when the project started.*
- Comments on the project implementation and completion, and its efficiency and effectiveness, strength and weaknesses etc.*
- Any feedback on the project's relevance from the partners and stakeholders*
- Indications and reasons for any changes which have been made to the project's original plans, and actions to follow-up*
- Areas of success to build on, after the project's implementation period and best practices that could be useful for the community*
- Main lessons from the project experience that could be applied in other contexts*
- Conclusions from your experience during the implementation of the project and recommendations for the GBIF Secretariat or the community to reinforce the success of the project*

(Max. 400 words)

[The year 2020 was especially complex due to the COVID-19 pandemic scenario, which forced institutions to restructure staff teams, agendas and targets, budgets, planning and therefore prioritize certain programmes. In the case of the institution leading this project, the Ministry of the Environment of Chile, also was affected by the above factors. Unfortunately, the institutional agenda did not allow the management of limited resources and the continuous restructuring of the project, and the project had to be closed.]

10. Sustainability plans

Please provide a description of how the partners involved will build on the results of this project in their future work. This could include future collaborative activities, such as plans to complete any unfinished project activities and how the future impact of the project could be monitored and/or measured.

(Max. 200 words).

Descripción general

Introducción

El presente curso se enmarca en el proyecto "Data Use for Decision Making Workshop: an Iberoamerican community call" CESP ID 2019-005, financiado por el programa Capacity Enhancement Support Programme (CESP) del Global Biodiversity Information Facility (GBIF).

Este programa tiene por objeto incrementar el volumen de datos sobre biodiversidad disponible, para su uso en el ámbito de la investigación científica y de la formulación de políticas en los países socios de la red a nivel global.

GBIF apoya acciones para mejorar la capacidad de los países y organizaciones asociadas, que contribuyen y se benefician de esta red global como una infraestructura internacional de datos abiertos de biodiversidad, apoyando la investigación y promoviendo decisiones basadas en la evidencia que afectan a la vida en la tierra y al desarrollo sostenible.

El principal objetivo del Programa CESP es abordar las necesidades específicas de creación de capacidad, identificadas por los Participantes de GBIF, facilitando la colaboración a nivel regional y global.

Para obtener más información sobre el programa, consulte la página <https://www.gbif.org/es/programme/82219/capacity-enhancement-support-programme>

Datos y conservación

En el plano mundial, se han desarrollado indicadores sobre la biodiversidad para supervisar el avance hacia el logro de las metas establecidas en el Convenio sobre la Diversidad Biológica, y es posible adoptarlos a nivel nacional. Estos indicadores son «medidas basadas en datos verificables que aportan información adicional al margen de los datos en sí», de manera que la interpretación de los datos dependerá de la finalidad del análisis. Por ejemplo, el tamaño de una población de elefantes puede ser un indicador de la extensión del hábitat apropiado o de la intensidad de las amenazas a esa especie, así como del grado de protección de la que es objeto. En ocasiones, estas medidas se pueden emplear para crear índices de mayor complejidad, a continuación, se recogen algunos ejemplos de indicadores:

- Índices de la Lista Roja
- Índice del Planeta Vivo
- Alcance de las zonas protegidas
- Crecimiento de los registros de presencia a los que se puede acceder a través de GBIF

Sin embargo, la mayor parte de los indicadores son de alto nivel y se necesitan datos primarios del primer nivel de abstracción para obtener productos de información que sirvan de apoyo a la presentación de informes sobre progresos.

Productos de información basados en datos

Lista Roja de Especies Amenazadas de la UICN

La Lista Roja de Especies Amenazadas de la UICN™ está ampliamente reconocida como el mecanismo mundial más completo y objetivo para evaluar el estado de conservación de las especies vegetales y animales. Está cobrando una relevancia cada vez mayor a la hora de orientar las actividades de conservación de los gobiernos, las organizaciones no gubernamentales y las instituciones científicas y, en concreto, se considera un indicador de los avances en el logro de las Metas de Aichi para la Diversidad Biológica. Se trata de un enfoque estandarizado y de rigor científico que determina el riesgo de extinción aplicable a todas las especies, de manera que se ha convertido en un estándar a nivel mundial.

El objetivo de la Lista Roja de la UICN consiste en proporcionar información y análisis sobre el estado, las tendencias y las amenazas de las especies con el fin de fundamentar y catalizar las iniciativas encaminadas a conservar la biodiversidad. Se puede realizar a nivel global y regional o nacional, y se consigue mediante:

- el establecimiento de un nivel de referencia respecto al que controlar los cambios en el estado de las especies;
- la provisión de un contexto global para la definición de las prioridades de conservación a nivel local;
- el control continuo del estado de una selección representativa de especies (como indicadores de la biodiversidad) que abarque los principales ecosistemas del mundo.

Las categorías y criterios de la Lista Roja de la UICN proporcionan un marco explícito y objetivo para la clasificación del espectro más amplio posible de especies según su riesgo de extinción. La evaluación de las especies
