

Which region do you come from?

What makes a good mentor?

What do you expect to contribute and/or gain from becoming a mentor?

happy to share my experience and knowledge

Participate in discussion forum

training, applied science, theoretical science in biology, conservation and genetics

share knowledge from a background both in biology and library science

To improve data mobilization state in my region, to learn new skills and knowledge in biodiversity informatics, to communicate with like-minded people and create new ideas, to save biodiversity, to get knowledge about biodiversity in the region!

Data refine

Training

begin discussions about incorporating traditional/indigenous knowledge into biodiversity data resources

with knowledge and help in training in my region or doubts

What do you expect to contribute and/or gain from becoming a mentor?

Contribute to data collection on biodiversity

Learn from challenges faced by other people, a wider view about the all GBIF Community actions and needs (not only in my region/country scale)

sharing international experience in training and field work

Helping in technical support, data immobilization

support with taxonomy

training undergraduates and early career professionals in responsible data management
