“A continuous data mobilization of Vietnam
bryophyte and lichen collections”

The visit to
Cryptogam
collection (PC),
Herbarium of the
Muséum national
d'Histoire Naturelle
(MNHN - Paris)

16-25 September 2019

Dr. Sébastien Leblond and Lionel Kervran showed the team from PHH the Bryophyte collection in PC.

Tixier's collection from Vietnam in 1950s–1960s

Pierre TIXIER (1918-1997) is one of the main bryophyte collector in Vietnam from the period of 1950s–1960s, and the author of ca. 20 papers about mosses and liverworts in Vietnam. While majority of his collection have been cooperated in the General Herbarium of PC, a large amount of specimens (estimated ca. 1000) remain untreated.

Tixier's old collection from Vietnam

Herbier Général

Pulling out Vietnamese specimens
in the Herbarium Général

Checking for synonyms
of Vietnamese
specimens in the
Herbier Général

Prof. Pocs Tamas was identifying epiphyllous liverworts collected by Tixier.

Discussing Vietnamese specimens in PC Herbarium with the curator Dr. Sébastien Leblond

Discussing the results and future work with the staffs in PC

About 500 specimens from
Tixier's old collection were
organized and nicely enveloped
for computerization.

Thanks to
Dr. Sébastien Leblond,
Lionel Kervran and
other staffs in PC
Herbarium for great
support.
