

Workshop on “Beetle taxonomy, sequencing and ecology” incorporate with Advanced Field Course in Ecology and Conservation-XTBG by Nakamura-01Th-10th November 2022 (assist by Nimalrathna)

Figure 1. Images show Nakamura teaching the identification of predator bite marks on artificial caterpillars.

Figure 2. Nakamura was teaching about insect identification and classification them up to the family level based on their morphology. Images show students trying to identify insects collected from different traps during the earlier field sessions
