Scientist Talk About Research

Lincoln Blevens

Global+progressive+pragmatic energy
and sustainability executive, thought-
leader, and communicator.

It is our great pleasure to welcome you all to the International "World Premier Congress on Sensors, Smart Grids and Internet of Energy" which will be held from Oct 28-29,2020 at Rome, Italy.

The World Premier Congress on Sensors, Smart Grids and Internet of Energy is the premier international forum to present and discuss progress in research, development, standards, and applications of the topics related to the Sensors, Smart Grids and Internet of Energy.

The main aim to organize the congress is to facilitate interactions within the research community and discuss the latest developments in this rapidly advancing field and also it aims in sharing new advances and new concepts among the industrialists, experts, and graduate students from the scientific arena of Sensors, Smart Grids, Internet of Energy to share their current developments and applications in different fields and enjoy intuitive talks and specialized sessions at the occasion. By using IoE technology, manufacturers and producers can reduce inefficiencies in existing energy infrastructure by increasing generation, transmission, and use of electricity.

Don't miss this opportunity to be inspired by joining colleagues from all over world to update yourself, to enjoy the exercise opportunities and social events. Save the date, register to receive the newsletter, start preparing your poster abstract and don't forget to tell your colleagues – this is going to be the best celebration ever!

Co-located events include Premier World Congress on Big Data, Security and Internet of Things. Sensors Forum 2020 will also be co-located with the Premier World Congress on Green Energy and Renewable Energy, Premier Summit on Automation and Artificial Intelligence.

Register
On or Before October 01, 2020 to
Meet the Experts &
Express your thoughts

Sincerely,
