

STAND UP SCIENCE.

Fundraising is so important because it allows scientists like me to continue our research and bring better tests and treatments one step closer to people affected by cancer. I want to say a huge thank you to everyone who supports the Stand Up To Cancer campaign.

Dr Alexandra Clipson

Since 2012, our supporters have funded 73 groundbreaking projects and clinical trials, turning breakthroughs in the lab into new techniques and treatments that could really make a difference for people with cancer.

Every day, our researchers work tirelessly to beat the disease. They're finding ways to make cancer treatments more targeted, effective and personalised. They're improving technology to detect cancer faster. And they're even boosting the immune system so that it's better at destroying cancer cells.
