

# IOTTA: Inbound Outbound Truck Turn Around

## Secure, Real-Time Logistics Optimization

Olam Agri and Mindsprint developed IOTTA to address inefficiencies, fraud, and delays in truck movement using real-time data, advanced analytics, and automation.

## Core Capabilities

### Truck Monitoring

Tracks truck movement, detects unauthorized swaps, and triggers real-time alerts for deviations or missing trucks.

### Tare Weight Analysis

Integrates with weighbridge systems to compare pre- and post-loading weights, identifying load tampering.

### Data Compliance & Dashboards

Offers real-time dashboards, reports, and fraud alerts to ensure compliance and improve transparency.

### Image-Based Verification

Leverages OCR and computer vision to match truck images, verify license plates, and prevent fraud.

### Idle Time & Delay Tracking

Monitors waiting times for TAT analysis, reducing inefficiencies and improving turnaround time.

## Success Story

### Securing Grain Transport

With IOTTA, a major agribusiness achieved:

**99%**

Accuracy in truck entry and exit verification.

**95%**

Faster truck turnaround time.

Fraudulent truck swaps reduced to

**nearly zero.**

## Why Choose IOTTA?

Stronger audit controls

Improved turnaround efficiency

Streamlined, integrated processes

Real-time accuracy

Lower losses, better margins

## Unlock Smarter Logistics

IOTTA transforms logistics across sectors with fraud prevention, real-time tracking, and operational efficiency.
