**MIND**SPRINT

planview™

Lead to Revenue:

Future-proof your business agility with Mindsprint's Planview solution

Break down silos, drive innovation, and maximize ROI with Mindsprint's integrated Project and Portfolio Management solutions
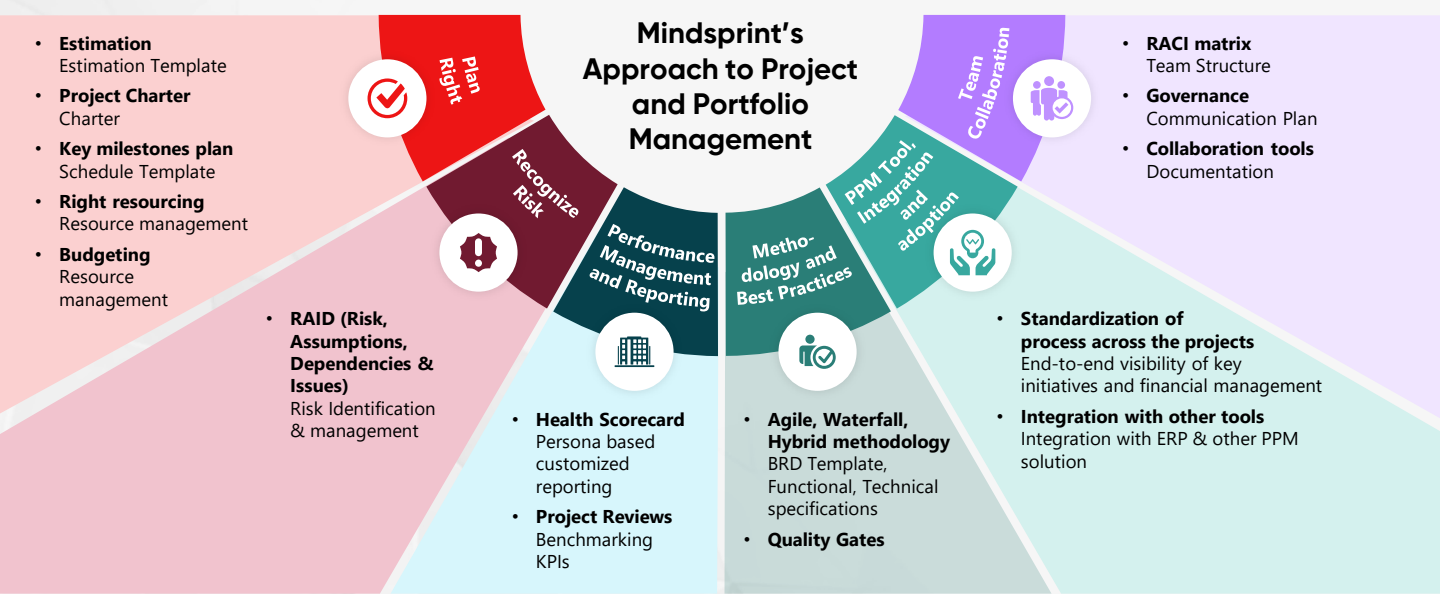

Sprint into mindful possibilities

In today's competitive landscape, organizations are under pressure to deliver projects and programs efficiently. But all too often, disconnected systems, manual workflows, and siloed decision-making hold them back. This fragmented approach lead to inefficiencies, limited visibility, and hindered the organization's ability to effectively manage its projects and resources.

## The results are too familiar: Missed Opportunities, Lost Value

Inefficient resource allocation, leading to wasted time and resources

Inability to respond quickly to changes in capacity, leading to delays and inefficiencies

No comprehensive single, unified view of project performance

Suboptimal project and portfolio performance, leading to wasted resources, delayed timelines, and reduced ROI

Missed opportunities due to lack of strategic planning

Poor visibility into project progress, making it difficult to identify and address issues

But what if you could break down these silos and streamline your project and portfolio lifecycle?

A New Approach to Project and Portfolio Management

Mindsprint's Approach to Project and Portfolio Management

Plan Right

- **Estimation**
  Estimation Template
- **Project Charter**
  Charter

  Documentation

Mindsprint

Mindsprint's Project and Portfolio Management solutions offer a robust and integrated platform to drive business success

Maximize value and ROI through optimized project and portfolio performance

Gain real-time visibility into project progress and performance

Enhance strategic decision-making with actionable insights

Empower your teams to collaborate and make informed decisions

Respond quickly to changing market conditions and customer needs

Drive innovation and speed-to-market with strategic project delivery and adaptive planning

Boost the accuracy of reporting with access to real-time data that can be communicated with its executive team with confidence, and at speed

Key Features

Mindsprint's Project and Portfolio Management solution offers a robust set of features designed to streamline your project and portfolio lifecycle. **Here are some of the key highlights:**

Create a **connected value-delivery ecosystem** with other tools used by departments across the organization such as effortless integration with Jira, Excel, and SAP.

Comprehensive Process Lifecycle View: Visualize and track progress across all stages with a comprehensive process lifecycle view, complete with stage gates.
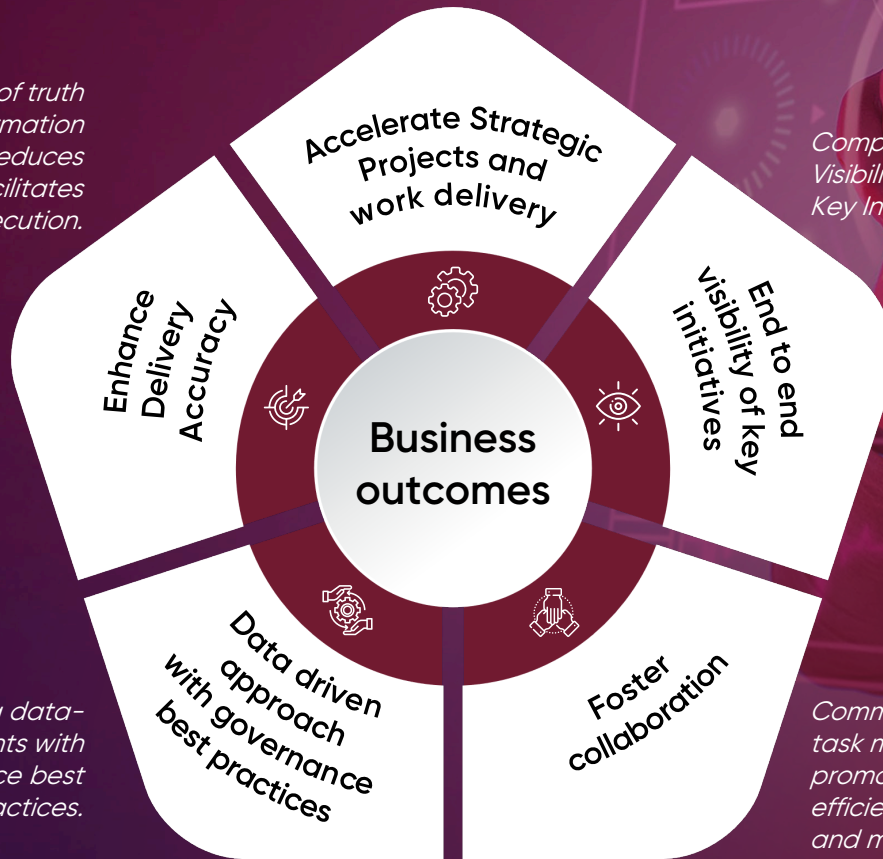

End-to-End Control Visibility: Gain visibility and control at the portfolio and Line of Business (LOB) level.

Intuitive User Experience: Enjoy an easy-to-use interface that ensures seamless adoption and minimal training requirements.

Centralized Repository: Access and reference meeting documentation easily, facilitating improved knowledge retention and collaboration.

Mindsprint

Streamline processes and eliminates manual tasks, significantly reducing project life cycles.

A single source of truth for project information ensures clarity, reduces errors, and facilitates smoother execution.

Complete Visibility into Key Initiatives

Accelerate Strategic Projects and work delivery

Enhance Delivery Accuracy

End to end visibility of key initiatives

Business outcomes

Data driven approach with governance best practices

Foster collaboration

Combining data-driven insights with governance best practices.

Communication and task management tools promote teamwork and efficient project tracking and monitoring.

Mindsprint

Transforming Project & Portfolio Management
A Journey to Maturity

As organizations evolve, their project & portfolio management needs become more complex. Mindsprint understands this challenge and has developed a solution to support organizations along their maturity journey.
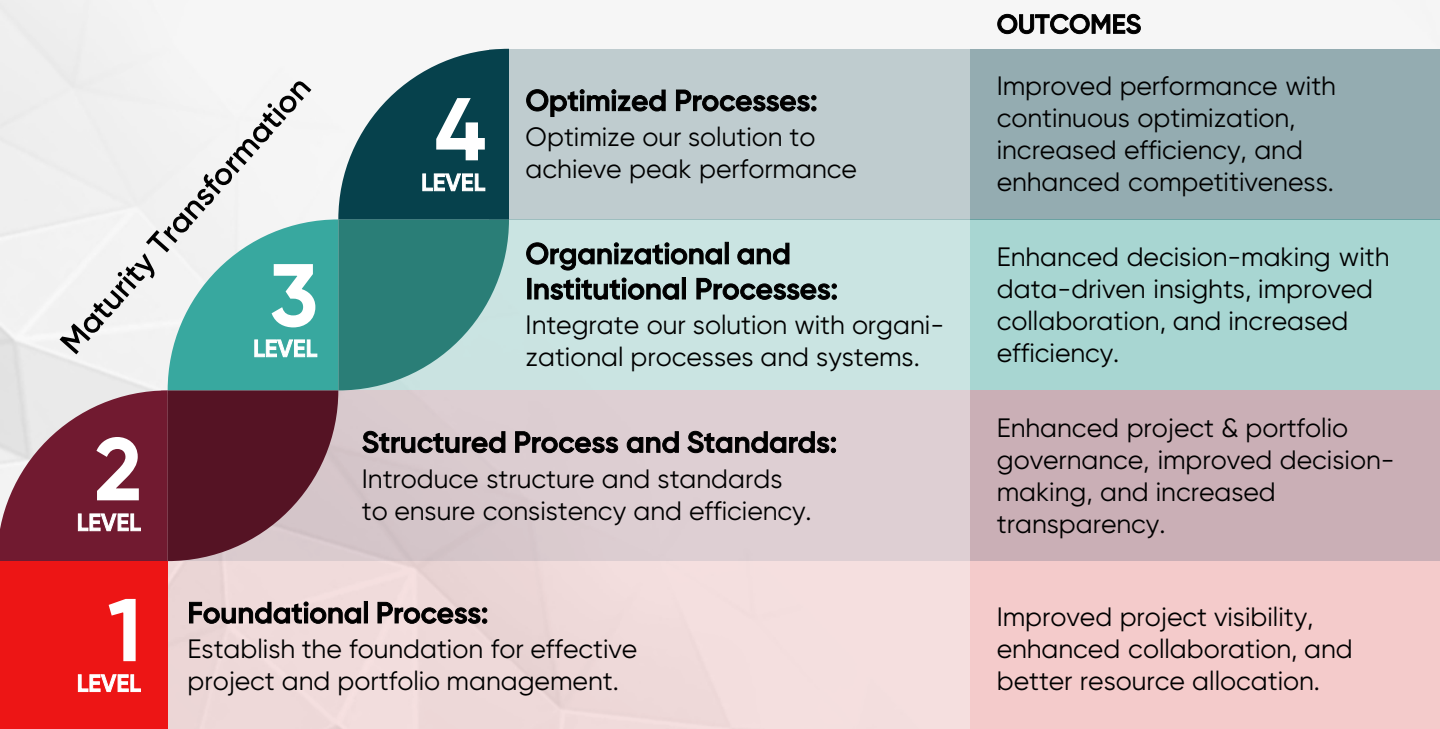

Where is your organization on its portfolio management maturity journey?

Mindsprint will evaluate the current state by assessing **project and portfolio management processes** to determine your maturity level.

Mindsprint Project & Portfolio Management Professional Services helps customers improve their project maturity (PMMM) and effectively manage project triple constraints (Scope, Time, Budget) through its distinctive constructive consulting approach.

Our Maturity Methodology

We have developed a structured maturity methodology that supports organizations in their transformation, from foundational processes to optimized ones. Our approach is divided into four levels:

Maturity Transformation

OUTCOMES

LEVEL 4 — **Optimized Processes:** Optimize our solution to achieve peak performance

Improved performance with continuous optimization, increased efficiency, and enhanced competitiveness.

LEVEL 3 — **Organizational and Institutional Processes:** Integrate our solution with organizational processes and systems.

Enhanced decision-making with data-driven insights, improved collaboration, and increased efficiency.

LEVEL 2 — **Structured Process and Standards:** Introduce structure and standards to ensure consistency and efficiency.

Enhanced project & portfolio governance, improved decision-making, and increased transparency.

LEVEL 1 — **Foundational Process:** Establish the foundation for effective project and portfolio management.

Improved project visibility, enhanced collaboration, and better resource allocation.

Take the First Step

Don't let inefficiencies hold you back. Discover how Mindsprint's Project and Portfolio Management solutions can help you unlock efficient project delivery and achieve your goals.
