Australia Cotton Analytics Solution

Data-driven insights for smarter decisions in a volatile market

Key Focus Areas

1

Margin Optimization

Evaluates whether internal ginning yields higher profits than pre-ginned cotton.

2

Ginner Competition Analysis

Assesses the impact of 25 competing gins on pricing and margin strategies.

3

Weather Correlation

Leverages weather trends to improve margin forecasting accuracy.

Solution Approach

Data-Backed Margin Insights
Structured analysis comparing internally and externally sourced cotton margins.

Competitive Benchmarking
Evaluates ginner competition and its profitability impact.

Weather-Driven Forecasting
Uses historical weather data to anticipate market fluctuations.

Why It Matters

Better Profitability Insights
Understand the impact of ginning choices on margins.

Strategic Market Positioning
Optimize operations with data-backed competition insights.

Proactive Planning
Build resilience by factoring in weather-based risks.

Reliable, Informed Decisions
Make accurate, data-led choices across pricing, sourcing, and operations.

Outcome: Turning Data Into Decisions

This solution empowers Olam Agri to:

- Boost margins
- Strengthen farmer relationships
- Scale operations smarter
- Navigate competitive and environmental factors confidently
