Cash Forecasting Analytics Solution

The Challenge:

Unpredictable Cash Inflows

Variability in customer payments and sales patterns makes forecasting difficult.

Manual & Error-Prone Processes

Spreadsheet-based methods are slow and prone to mistakes.

Lack of Real-Time Insights

Limited visibility into payments and invoice statuses delays decisions.

Cash Flow Disruptions

Shortfalls can lead to missed payments and higher borrowing costs.

Reactive Treasury Management

Without predictive data, cash decisions are inefficient.

Our AI-driven solution uses machine learning to analyze historical trends, automate forecasts, and deliver real-time insights, helping teams improve liquidity and navigate financial uncertainty.

Key Features

BI Integration
Automates reporting and forecasting with live dashboards.

ML Model
Predicts daily cash receipts for 30 days by currency at the customer level.

Data Analysis
Identifies patterns and key drivers of cash flow.

Customer Data
Personalizes forecasts using customer-specific payment patterns.

Market & Invoices
Considers external variables and unpaid invoices.

Success Metrics

~30% Improvement in forecasting accuracy.

$500K Expected interest savings through optimized cash management.

Why Choose Us?

1. **Enhanced Accuracy**
   AI-driven forecasts reduce errors and improve efficiency.
2. **Data-Driven Insights**
   Real-time visibility into payment behavior, market trends, and invoice clearance.
3. **Optimized Cash Flow**
   Better cash allocation, fewer disruptions, and reduced liquidity risks.
4. **Scalable**
   Flexible for any B2B business across industries.

Smarter Treasury, Stronger Business

Our AI-powered solution evolves with your business, giving your treasury team full control over cash flow. With automation and real-time insights, stay ahead of financial challenges — no guesswork, just smart decisions.
