KEY FEATURES

Attack Surface Discovery

Continuously map every exposed asset: Subdomains, cloud assets, leaked credentials, live validation.

Vulnerability Detection

Real exploitable weaknesses, not theoretical noise: OWASP Top 10, latest CVEs, cloud-specific scans.

Exploitation

Validated with real tooling that mimics senior pen-testers: Web & network exploits, vulnerability chaining.

Reporting

Actionable intelligence for security & executive teams: LLM + human validation, live dashboard & tracking.
