Rewire Your Enterprise with
Mindsprint's Intelligent Enterprise Operations

The difference starts with Intelligent Enterprise Operations (IEO), where AI and human ingenuity power the future of enterprise operations.

MINDSPRINT

Business processes need more than automation. They need intelligent reinvention powered by autonomous transformation, where processes run with minimal human intervention, while maintaining full visibility and control.

With Mindsprint's IEO, we are constantly engineering NextGen business processes with Agentic AI, rewriting the playbook for autonomous transformation.

Intelligent
Perfect blend of human ingenuity and artificial intelligence to drive smarter decisions and optimize performance

Enterprise
Synthesizing and synchronizing multiple business processes towards enterprise excellence

Operations
Empowering business functions with transformative "solutions", moving beyond traditional and transactional "services"

FEATURES

Domain and Functional Expertise
Deep domain and process expertise across finance operations, taxation, supply chain, procurement, manufacturing, risk & compliance, and human resources

Diversified Offerings
Flexible service models from standalone solutions and automation to advisory support and managed services, tailored to customer-specific needs

AI-First Approach
Applying human-centered GenAI and Agentic AI technologies at scale to drive smarter, insight-led actions and maximize outcomes with fewer resources

Advanced Analytics
Scalable diagnostic, predictive and prescriptive analytics powered by real-time and historical data, business intelligence and automated recommendations

Discover to Transform
Driving effective transformation through our proprietary approach that blends Process Discovery with Intelligent Automation

BENEFITS

Scalable Efficiency and Cost Optimization
Achieve over 50% reduction in operating costs by streamlining processes and optimizing resource utilization

Intelligent, Real-Time Decision-Making
Accelerate decision cycles by more than 30% with timely, actionable insights powered by intelligent automation and AI-driven analytics

Business Agility and Performance
Reduce process cycle times by over 60% and realize value more than 25% faster through end-to-end process optimization

Proactive Compliance and Risk Control
Zero compromise on quality and compliance with built-in controls, automated monitoring and timely risk mitigation

ROI Realization
Deliver faster, recurring returns through targeted interventions, smarter operations and continuous performance improvement

Why IEO?

Efficiency you can feel.
Transformation you can measure.
Innovation that sticks.

1. Agentic AI as the Spearhead

Our outcome-driven Agentic AI solutions reinvent enterprise functions through autonomous transformation. Solutions like SPRINT AP cut accounts payable costs by **50%** and cycle time by **70%,** ProcureSPRINT boosts procurement speed and agility by **3X,** and TradeSPRINT improves on-time deliveries by **50%** with a dynamic control tower-enabled supply chain.

2. Transformation Catalysts

We bring autonomous transformation to life through hyper automation powered by Agentic AI, integrating the right mix of technologies, guardrails and advanced analytics to craft leading edge solutions led services shaped with insights from a robust AI-enabled process intelligence platform

Synergistic Process Discovery

AI-enabled platform that helps organizations identify transformation areas and define an execution roadmap

Intellient Automation

Responsible deployment of advanced AI technologies
(GenAI and Agentic AI) at scale

3. Customer-Centric DNA

Our nimble operating model is anchored in:

- **Ownership above obligation:** From day zero, clients see operational uplift, greater transparency and continuous innovation embedded in delivery

- **Skin in the game:** We simplify execution, not just the automation narrative

- **Value over volume:** We combine deep domain expertise, operational excellence, productized delivery and intelligent automation to fast-track ROI realization

Accelerating Enterprise Reinvention: Framework Orchestrating Intelligent Organizations of the Future

Our offerings provide right building blocks to realize your vision of becoming a transformative, intelligent organization

Intelligent Organization of the Future

Develop long-term automation capabilities to drive innovation and operational efficiencies

Elevate 04

Hyper automation at scale

Leverage specialized platforms and AI/Gen AI solutions to drive differentiated business outcomes

Expand 03

| Conversational AI and chatbots | Intelligent Digital Workers | Advanced Gen-AI / Machine Learning | Agentic AI |

Implement and manage integral rule-based automation technologies to realize process and cost efficiencies

Embark 02

| Robotic Process Automation | Workflow Automation | Process Orchestration |

Identify and define high-value automation opportunities through complete diagnostic and strategy assessment

Envision 01

| Process Discovery | Task Mining | Automation pipeline and roadmap development |

SUCCESS STORIES FUELED
BY AI AND VELOCITY

A Global Food and Agri Major Transitions to Real-Time Accounts Payable with Agentic AI

01
Automated the end-to-end accounts payable function using our Agentic AI platform (SPRINT AP)

02
Achieved **70%** reduction in cycle time, **50%** cost efficiency and improved supplier payment timelines

03
Strengthened compliance with built-in duplicate checks and audit trails

Leading Global Enterprise in Agri and Commodity Trade Cuts Turnaround Time by 90% with AI-Powered Supply Chain

01
Deployed AI-powered TradeSPRINT to digitize procurement and shipping processes

02
Enabled over **50%** improvement in on-time deliveries and **90%** reduction in turnaround time

03
Delivered **30–40%** efficiency gains in documentation and sourcing

04
Achieved **10–20%** cost savings and full supply chain visibility

South Africa's Leading Insurance Group unlocks Hyper-Efficiency Through Our proprietary "Discover to Transform" approach

01
Assess variants and noise through digital work patterns [process execution] at scale

Ascertain rule-based Work Patterns

02
~68% activities identified as potential candidature for standardization, optimization & automation

03
~50% Efficiency potential identified for improvement

04
~62% Reduction in TAT

U.S.-based value-added manufacturer achieves more than 70% efficiency gains through automated Proposal (RFQ/RFP) Management System

01
Cognitive automation solutions that can handle data & information from multiple file formats & emails with seamless integration across external and internal portals/applications

02
~70% reduction in cycle time of processing the regular tasks

03
100% accuracy and ensuring timely responses to all RFPs/RFQs

04
Streamlined their RFP/RFQ process through Improved compliance, consistency & standardization in Quote creation

MINDSPRINT

Mindsprint reimagines business through talent, technology, and insight-driven solutions.

With a proven track record spanning two decades, the company has enabled digital transformation for clients in over 60 countries, spanning diverse industries such as retail, agriculture, manufacturing, healthcare and life sciences.

Mindsprint offers a differentiated suite of services, including enterprise technology applications, business process services, and cybersecurity solutions.

Mindsprint is headquartered in Singapore, with a strong global presence across the US, UK, Middle East, India, Australia and Africa
