Bondex™ Bonding Agent

180-grit file
100/180-grit buffer
E-file & bits
OPTIONAL:
GelColor Super Base Base Coat

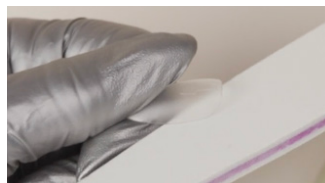

THE STEPS

BEFORE YOU BEGIN: Prep those nails! Follow OPI Salon Service Nail Prep Basics step by steps.

1

Size the GElevate Soft Gel Tips to all 10 nails making sure the tips cover the nail from side to side and fit at the cuticle line.

OPTIONAL:
If needed, size up the tip and customize sides and cuticle line as needed with a file.

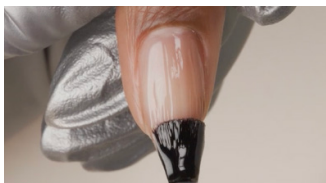

2

Working on one hand at a time, apply a coat of Bondex Bonding Agent and allow to dry.

OPTIONAL:
For a HEMA-free and soak off friendly service, skip Bondex application and apply a thin coat of GelColor Super Base Base Coat to all 5 nails. Cure for 30 seconds in the Star Light Gel Lamp.

3

Apply a thin coat of GElevate Builder OPI'm Flawless to all 5 nails leaving a thin free margin around the perimeter of the nail. Cure for 30 seconds in the Star Light Gel Lamp.

4

Apply a small amount of builder gel to the inside of the tip.

5

Align the cuticle line of the tip to the natural nail at a 45° angle and gently rock the tip forward pushing the builder gel to the free edge of the nail.

6

Flash cure the nail for 5 seconds with the Lightning Flash Cure Gel Lamp.

Step-by-Step

THE STEPS CONTINUED

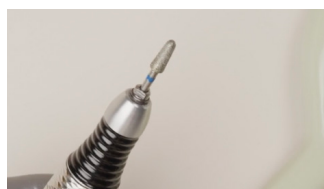

7

Repeat steps 3-7 on remaining nails until all nails are complete. Cure for 30 seconds in the Star Light Gel Lamp, and repeat on the other hand.

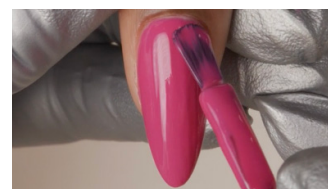

OPTIONAL:

Remove gel residue with a nail wipe saturated with N.A.S. 99 Cleansing Solution and refine shape with a file as needed.

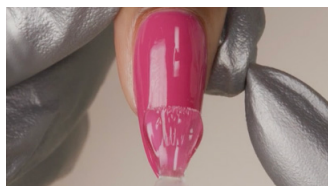

PRO TIP

If any gel seeps out from around the perimeter or underneath the nail, use a tapered bit to gently remove excess product.

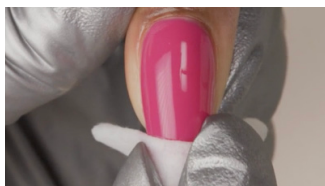

OPTIONAL:

Apply 2 coats of OPI GelColor, curing each layer for 30 seconds.

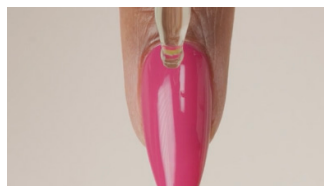

8

Apply a coat of GelColor Super Gloss Top Coat. Cure for 30 seconds in the Star Light Gel Lamp.

9

Remove gel residue with a nail wipe saturated with N.A.S. 99 Cleansing Solution.

10

Apply a drop of ProSpa Nail & Cuticle Oil to the base of each nail and massage in.
