PRODUCTS USED

Expert Touch Nail Wipes	240-grit nail file
Expert Touch Lacquer Remover	Nail trimmer
ProSpa Exfoliating Cuticle Cream	Cuticle pusher
N.A.S. 99 Cleansing Solution	Cuticle removal tool
BondAid	Cuticle nipper

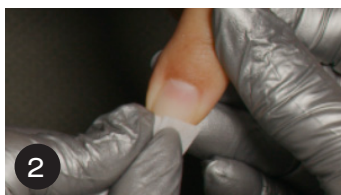

PRO TIP

Scrub nails well with N.A.S. 99 Cleansing Solution, changing nail wipes every 2-3 nails. Nails should appear slightly matte once cleansed.

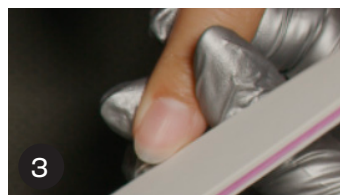

STEPS

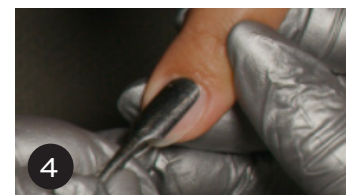

1 Have your clients wash hands and dry their hands thoroughly.

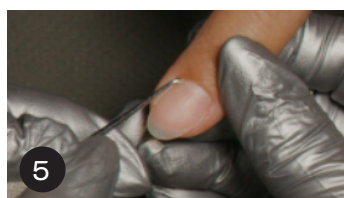

2 Remove old lacquer with a nail wipe saturated with Expert Touch Lacquer Remover.

3 Trim nails if needed and shape nails as desired with a 240-grit nail file.

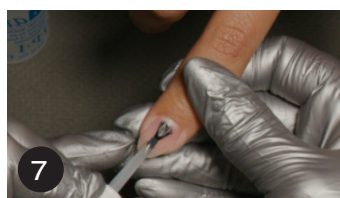

4 Gently glide the cuticle pusher along the nail, removing softened cuticle from the nail plate.

5 Use a cuticle removal tool or detailer to remove any remaining cuticle from the nail. Trim away any excess dead skin with a cuticle nipper, if needed.

6 Scrub the nail with a nail wipe saturated with N.A.S. 99 Cleansing Solution to remove any oil or debris.

7 Apply a layer of BondAid to each nail. Allow to dry.
