

Sensor and Cloud Services

This exciting 2018 season offering combines advanced new technologies, equipment and software from Cropx into a new real-time service to help farmers manage water and maximize yield.

A) Choose Your Sensor

1. Cropx “Double Helix” sensor \$600

- Real time soil volumetric water content measurement
- Measures at depths of 8” and 18” in the heart of the active root zone
- Installs in minutes
- Replaceable batteries
- Choose best local cellular carrier

2. Cropx “Double Helix Plus” sensor \$699

- Same features as above, with:
 - Rechargeable battery
 - Roaming modem automatically finds the best signal

3. Cropx “Double Helix Deep” sensor \$899

- Same features as the DH Plus, with:
 - 36” deep sensor

B) Add Your Services

1. Cropx Complete Cloud Services \$275/sensor/year

- Secure cloud based software package to manage all the sensors on your farm
- Cellular Service included in price
- Download your data directly from the Cropx Cloud to your computer anytime
- Connect via smartphone computer or tablet, Apple or Android
