Sydney Airport CEO Geoff Culbert said, “Passenger numbers have strengthened at Sydney Airport increasing 2.6% in the month of April over the prior corresponding period (pcp). International traffic grew 1.8% in April, with increased capacity of 6.5% being offset by lower load factors. Load factors were impacted by the earlier Easter holiday period for 2018 compared to 2017, resulting in a very strong comparative period.

“The nationalities with the largest growth in April were Indian (+18.0%), USA (+9.9%); and South Korean (+8.1%). Interestingly, international traffic benefited from strong growth in Taiwanese passengers, up 70% for the month and more than 40% year to date (not captured in the top 10 table below). The strong growth on this market is driven by the increased capacity from China Airlines.

“Domestic growth was a robust 3.1% for April compared to the pcp, driven by a 0.6 percentage point improvement in load factors and a 2.3% increase in capacity.”
