

Noise Strategy

PURPOSE

Take a more active role in noise management to enable more sustainable growth in line with our Master Plan 2045.

OBJECTIVES

Aircraft noise
(airborne)

GOAL

Improve collaboration, awareness and transparency as we grow

OUR APPROACH

Continually work with Airservices, airlines and the community to identify opportunities for improvement

Raise awareness of noise performance by engaging with airlines

Share data and insights on noise impacts & initiatives with the community

Ensure continual alignment with ICAO's 'Balanced Approach to Aircraft Noise Management'

Ground-based noise
(on-airfield)

GOAL

Reduce impacts where feasible and reasonable

OUR APPROACH

Adopt industry best practice for the assessment of ground-based noise impacts wherever possible

Reduce noise impacts to residents from Auxilliary Power Units (APUs), Ground Support Equipment (GSE) & engine runs where feasible and reasonable

Use technology wherever possible to monitor noise emissions

Support occupational noise management through improved monitoring and awareness
