# Breeding Mix

*Breeding Mix is a flaked mix intended especially for breeding. The product is intended for pregnant and lactating mares and for foals up to three years old. The quality of the proteins and fatty acids used in this product ensures optimum growth and development. This mix contains all the necessary vitamins, minerals and trace elements and is the ideal solution for breeding mares and growing foals.*

This flaked mix contains top quality ingredients:

**Linamix®**  
Extrusion based on linseed (omega-3), chicory containing inulin (probiotic), slow-release sugars (EquiSweet) and grains.

**Soya flakes**  
Soya flakes contain good-quality proteins (essential amino acids). As they have been cooked and crushed, they are easy and safe to digest.

**Flaked cereals**  
Flaked cereals are highly digestible further to their cooking and rolling.

**Alfalfa**  
High-quality fibres containing essential amino acids and calcium.

**Cereal corrector**  
Enriched with vitamins, minerals and trace elements, this corrector allows for a good balance between the different nutrients in the ration.

**Slow-release sugars**  
EquiSweet is a healthy sugar syrup that ensures progressive and gradual energy delivery.

## INDICATIVE NUTRITIONAL VALUES

<b>UFC/kg</b>	<b>0.85</b>
<b>DE horse (MJ/kg)</b>	<b>11.82</b>
<b>DCP horse</b>	<b>12.1</b>
<b>Ewpa</b>	<b>0.85</b>
Crude protein (%)	15.5

Organic selenium (mg/kg)	0.15
Selenium (mg/kg)	0.35
Iodine (mg/kg)	0.7

## HOW TO USE

To be fed at a rate of 0.7 to 1 kg per 100 kg of body weight per day. To be adjusted depending on the breed and the quality of the roughage. The feed must always be supplemented with good quality, free-choice roughage. The horse must always have access to clean and fresh water. Always store the feed in a cool, dry place away from light.
