Frysk Mix

EQUIFIRST
feeding your dream

Frysk Mix is a flaked mix that was specially developed for Friesian and baroque horses. The product is suitable for horses that need a great deal of endurance, e.g. for dressage or driving trials. It is enriched with Linamix® and soya flakes and provides first-class nutrients, such as omega-3, and a particularly complete range of amino acids. As well as vitamins, minerals and trace elements, it also contains added copper and zinc. The pectin supplement guarantees good intestinal transit and the low sugar and carbohydrate content ensures safe digestion.

This flaked mix contains top quality ingredients:

Linamix®
Extrusion based on linseed (omega-3), chicory containing inulin (probiotic), slow-release sugars (EquiSweet) and grains.

Soya flakes
Soya flakes contain good-quality proteins (essential amino acids). As they have been cooked and crushed, they are easy and safe to digest.

Slow-release sugars
EquiSweet is a healthy sugar syrup that ensures progressive and gradual energy delivery.

Cereal corrector
Enriched with vitamins, minerals and trace elements, this corrector allows for a good balance between the different nutrients in the ration.

Organic selenium
Organic selenium is part of the antioxidant family and is in a form that is easily assimilated by the body.

Sodium bicarbonate
Sodium bicarbonate is a powerful acid neutraliser.

HOW TO USE

To be fed at a rate of 200 to 500 gr per 100 kg of body weight per day. To be adjusted depending on the intensity of work and the quality of the roughage. The feed must always be supplemented with good quality, free-choice roughage. The horse must always have access to clean and fresh water. Always store the feed in a cool, dry place away from light.
