High-quality proteins
For an optimal start

Starting Cube

Starting Cube is a pellet especially intended for foals up to 1 year old. This pellet is designed for rapid foal growth. It is composed of raw materials with a high biological value, including dairy products. By adding the OS complex, the risk of OCD and OC is reduced. This pellet contains an optimal ratio of copper, zinc and manganese promoting the uninterrupted development of joints, cartilage, tendons and bones.

This flaked mix contains top quality ingredients:

OS complex

A specially-developed complex with an optimal ratio of copper, zinc and manganese promoting the best possible development of joints, cartilage, tendons and bones.

Milk powder

High lactose content enabling a high-quality boost to growth.

Organic selenium

Organic selenium is part of the antioxidant family and is in a form that is easily assimilated by the body.

Vitamin C

Vitamin C protects against cell ageing. It is essential for immune system functioning and increases the assimilation of iron of plant origin.

HOW TO USE

To be fed at a rate of 0.5 to 1 kg per 100 kg of body weight per day. To be adjusted depending on the breed and the quality of the roughage. The feed must be supplemented with quality, free-choice roughage. The horse must always have access to clean and fresh water. Always store the feed in a cool, dry place away from light.
