## What is GMO?

GMO stands for Genetically Modified Organism. Genetic modification means the DNA of the organism has been modified. In the case of vegetable crops, this is done to make them more resistant to certain diseases. Genetic modification is strictly controlled and subject to European legislation to ensure it is safe.

### **GMO-free / NON-GMO raw materials / GMO-controlled**

Despite the fact genetically modified crops have been cultivated and used in animal feed for many years, it remains a hot topic and many people prefer not to use it. Many pet owners and animal lovers have a close relationship with nature and want to treat it with respect. They do not want to interfere with biodiversity too much, and they want to give animals the opportunity to be able to express their natural behaviour and provide them with a food containing purely natural ingredients. Feed without genetically modified raw materials is completely in line with this philosophy. Claiming a product is 100% GMO-free is not always feasible in practice because there is always a potential for cross-over of raw materials during collection, intermediate storage, transport, processing, etc. This residue, however small, could be for example, GMO maize. Legislation has provided for this and refers to NON-GMO raw materials. This term applies to batches of raw materials that consist of at least 99.1% pure, non-genetically modified product.

### **GMO-free Formulated**

Strict requirements concerning the purchase of raw materials, careful production processes, and meticulous control of feeds ensure they are as free from GMOs as possible. This method is laid down in an additional GMP+ quality system and is called GMO-Formulated.

**So, all these feeds are, in principle, GMO-free Controlled (with the exception of the Balance range).**

# Hope Farms knows what your favourite pet needs...

Nutrition and health are inextricably entwined. Good, healthy feed is absolutely essential for healthy, high-spirited animals with beautiful coats.

HobbyFirst Hope Farms feed ensures good physical condition and an excellent level of resistance against (infectious) diseases. HobbyFirst Hope Farms (small animals and rabbits) nutrition is the result of intensive scientific research and years of experience.

# HobbyFirst Hope Farms Rabbit Complete

**Rabbit Complete** is a healthy feed made with high-quality raw materials and delicious ingredients. This feed, combined with hay, provides all the nutrients for every nutritional need.

The all-in-one kibble prevents selective eating behaviour. It is based on a grain-free recipe, and extra timothy hay has been added.

## HobbyFirst Hope Farms Rabbit Complete

Grain Free

Grain-free composition for healthy digestion.

Dental Care

The many different fibres contribute to healthy tooth wear.

Rich in Timothy

Timothy grass is a healthy source of fibre, suitable for a diet with a low calcium content.

# HobbyFirst Hope Farms Rabbit Junior Complete

**Rabbit Junior Complete** is a healthy feed made with high-quality raw materials and delicious ingredients. This feed, combined with hay, provides all the nutrients for young rabbits' every nutritional need, from the age of 2 to 3 weeks up to approximately 26 weeks.

The all-in-one kibble prevents selective eating behaviour. It is based on a grain-free recipe and contains ingredients that provide extra support for the intestinal health of young rabbits to help them grow up healthy.

## Hallmarks of Hope Farms Rabbit Junior Complete

Grain Free

Grain-free composition for healthy digestion.

Growth Formula

Especially suitable for young, growing rabbits.

Rich in Alfalfa & Timothy

Lucerne (alfalfa) and timothy grass are healthy sources of fibre that meet the nutritional needs of your rabbits.

## HobbyFirst Cuni Muesli

With **Cuni Muesli**, your dwarf, show or cuddle rabbit will enjoy a varied mixture. This complete feed consists of delicious cereals and flakes. In addition, fibre and hard grains are also included to ensure the maintenance of healthy intestines and teeth.

CUNI MUESLI15 KG

## HobbyFirst Cuni 2 Pellet

The **Cuni 2 Pellet** is an all-round pellet based on alfalfa. The fibres in this pellet make this a very tasty, appealing and easily digestible feed. Moreover, this feed does not contain a coccidiostat so that it can be used up to the time of slaughter.

CUNI 2 PELLETT 20 KG

## HobbyFirst Cuni 4 Pellet

The **Cuni 4 Pellet** is a tasty and easily digestible pellet that promotes excellent health. This highly productive pellet based on alfalfa is the ideal feed for achieving good results in an intensive breeding regime. The presence of coccidiostats and fibre ensure healthy intestinal flora.

CUNI 4 PELLETT 20 KG

## HobbyFirst Guinea Pig Muesli

With **Guinea Pig Muesli**, you are providing your guinea pigs a very appealing feed. The choice of ingredients makes the flavour intense – pure pleasure for your guinea pig. This muesli contains all the vitamins, such as vitamin C, and other nutrients needed to keep your guinea pig healthy and fit.

## HobbyFirst Guinea Pig Pellet

**Guinea Pig Pellet** is a tasty feed that is easy to digest. What's more, this pellet is also suitable for young guinea pigs, pregnant and/or lactating sows as well as older guinea pigs. To guarantee the health of your guinea pigs, this formulation consists of carefully selected raw materials and additional vitamin C.

## HobbyFirst Small Animals Mix

With our **Small Animals Mix**, you provide your guinea pigs, hamsters, rats, mice or other rodents with a special mixture. Feeding them this mixture of grains and seeds guarantees that your small animals receive all the essential vitamins, such as vitamin C, and minerals. This selection of raw materials is based on the natural diet of rodents.

## HobbyFirst Mouse & Rat Pellet

You can feed the **Mouse & Rat Pellet** to rats that are used for breeding or to pet rats as a maintenance pellet. The selection of nutrients and vitamins in this feed guarantees healthy and strong development.
