PRIMATE PT 1 PELLETS

COMPLEMENTARY FEED FOR PRIMATES

This feed has a long history in feeding it to several Old World primate species.

- With pre-cooked wheat for an easy digestion
- Contains an elevated level of fibre, especially cellulose and lignin (ADF fraction) for a healthy intestinal tract
- With a balanced pattern of vitamins and minerals for good health
- With organic bound trace-element zinc, manganese and copper to support locomotion, skin and hair, immunity and reproduction
- Contains vitamin C in stabilized form.

Feeding advise:

Primates eat about 2-4% of their body weight as feed. This feed should be fed in respect to their condition, together with leaves, vegetables and some fruit for their well being.

Feed at least one third of their daily ratio with pellets. These pellets may include at maximum 65% of the total feed ratio (on dry matter basis).

Product shape

Brok 10 mm

Composition:

pre-gelatinised wheat, soybeanmeal feed, lignocellulose (spruce), wheat middlings, oats, cutted and dehulled, miscanthus giganteus, apple pulp, dried, wheat flour, potato protein, cane molasses, inactivated yeast, soybean oil, monocalcium phosphate, sodium chloride, maerl.
