

ATP PLUS

ATP Plus is a feed concentrate rich in various types of vegetable oil

Feeding your horse 1 kg of ATP Plus adds 250 ml of oil to the ration.

This mixture is ideally suited for sport horses with high energy requirements. Moreover, the high fat content ensures a shiny coat and a balanced ratio of omega 3-6-9 fatty acids. A characteristic feature of energy from vegetable oil is that no lactic acid is formed when it is burned. ATP Plus is suitable for horses that do not get enough energy from a standard concentrated feed. This concentrate has almost twice the energy value of a standard concentrated feed.
